Summary

Third-year Computer Science student focused on full-stack development and systems-level programming (React/Node, C++, Python). Currently using passion of design to contribute to an automotive HMI design in the 2026 UCR EcoCAR competition team. Seeking a software/systems internship focused on engineering efficient products that bring joy to the user through thoughtful visual and functional design.

Professional Expertise

Languages: C++, ARM Assembly, Java, Python, JavaScript, HTML/CSS, TypeScript, Swift, PostgreSQL

Frameworks and Platforms: React, Node.js, Tailwind CSS, WordPress, Shopify

Tools: Git, Docker, Valgrind, GDB, Roboflow, Kaggle, VS Code, Figma, Adobe Suite, Office Suite

Experience

EcoCAR	Sep. 2025 - Present
Human Machine Interface Designer	Riverside, CA

- *National competition sponsored by General Motors where student-teams use a 2023 Cadillac LYRIQ to create a next generation electric vehicle.*
- Designed automotive Human Machine Interface (HMI) for a 2023 Cadillac LYRIQ competition vehicle in collaboration with a 6-member connected autonomous vehicles (CAV) team.
- Implementing interactive menu in Enovation PowerView 1200 display using proprietary tooling.

Legion Force Automotive	Jan. 2025 - May 2025
Web Designer and Developer	Seal Beach, CA

- *A startup consultation company focused on optimizing product launches for automotive OEMs and dealers.*
- Reported to the CEO to deliver production website using Wordpress and custom HTML/CSS.
- Applied creative experience to design Figma wireframes that aligned with business requirements.

HDA Technology	Jul. 2023 - Oct. 2023
Assembly Assistant Intern	Lake Forest, CA

- *Manufacturer of the Replexa+, a thermal shortwave diathermy medical device used to promote healing.*
- Assembled and tested Replexa+ medical devices supporting \$1M in annual gross revenue.
- Soldered/assembled PCB components and performed OS-level testing via terminal tools.
- Collaborated alongside engineers on-site to ensure devices were market-ready.

TSE Worldwide Press	Jul. 2021 - Apr. 2022
Creative Production Intern	Rancho Cucamonga, CA

- *Book publishing company focused bringing new and established author's ideas to fruition.*
- Reported to CEO and collaborated in team environment to prepare *From Illusion to Reality* by Sarah Y. Tse. for market readiness. Tasks included designing cover and reviewing draft script for accuracy.
- Conducted market research and gained new clients through cold-calling.

Education

University of California, Riverside,
Bachelor of Science in Computer Science (Graduating 2027)

Sep. 2025 - Present
Riverside, CA

Saddleback College,
Associate of Science in Physics, Transfer Certification for UC System

Aug. 2023 - May 2025
Mission Viejo, CA

Additional Achievements / Projects

Interactive 3D Gallery | RoseHack 2026 | Unity, Mediapipe, Python

Sep. 2025 - Dec. 2025

- Awarded 2nd Place Overall for developing an accessible 3D virtual gallery application that integrates computer vision with custom hardware controls for use in educational and retail environments.
- Created a virtual environment in Unity linked to Google's MediaPipe through UDP to enable real-time hand-tracking gestures, allowing users to intuitively grab, zoom, and rotate 3D assets.
- Collaborated with a hardware team to link a custom ESP32-based wireless controller with the Unity interface to create a seamless, multi-modal user experience.

ACM: AI Security Camera | Python, YOLOv8, Roboflow, Kaggle, Tkinter

Sep. 2025 - Dec. 2025

- Worked in 3-member team in ACM Forge club to train a custom YOLOv8 model for real-time object detection using curated datasets (Roboflow)
- Built Python desktop GUI (Tkinter) for real-time camera feed visualization and alert generation through MQTT protocol.

ACM Spark: HCG Website | React, Node.js, Tailwind CSS, Git

Sep. 2025 - Dec. 2025

- Worked in 12-member team in ACM Spark to develop a website for the UCR Highlander Consulting Group following industry Git version control practices

The CodeBase at Saddleback College | HTML, CSS, React, JavaScript

Jul. 2024 - May 2025

- Assisted in leading club meetings with 40+ members and gave lectures on proper design practices to build user-focused, responsive websites for external charities and businesses.
- Collaborated with organization representatives to ensure requirements were fulfilled on time

Mazda RX-8 Rebuild | Project Management, Vehicle Testing

Jan. 2022 - May. 2022

- Removed and replaced key powertrain components, including the rotary engine, transmission, fuel pump, and hoses, following torque specs and OEM procedures.
- Reintegrated drivetrain systems (electrical, cooling, exhaust), ensuring full compatibility with newly installed drivetrain components.

Saddleback College - Certifications | Early College Pathway

Aug. 2021 - Apr. 2023

- Early College Pathway (ECP) with an emphasis on business, marketing, and finance.
- Certificates of Achievement: Business Communications, Business Education Core, General Business, Business Communication Skills

Airvon | Producing, Composition, Mixing, Mastering, Marketing

Apr. 2023 - Present

- Self-Produced and released music project with 100,000+ streams across platforms
