

Aidan C. Moran | 214-600-0991 | a1moran@ucsd.edu

9450 Gilman Dr #10321

La Jolla, CA, 92092

Education:

University of California, San Diego (current 1st-year)

- 4.0 GPA (current), with *Provost Honors* for Fall Quarter

St. Mark's School of Texas (9th Grade-12th grade, 2021-2025)

- Graduated *Cum Laude*, 4.3 GPA

Programming / Passion Projects

Exit the World / Enter the Next (virtual art group exhibition) (2025) [[link](#)]

- Worked with the Unreal Engine to design and program a virtual experience that illustrates a possible future where, to rewild Earth, we send human consciousnesses to servers in space.
- As a member of the team, I created the “Eden” environment, our rewilded Earth, programming the player's form to change often and glitch effects in the environment to show how unstable virtual embodiment is and how body scarcity pushes us to share a form with hundreds of entities at once.
- This was our final project for an upper-division visual arts course, VIS163, that focused on using programming to illustrate speculative futures.

Cynosure (wearable biomechanical tail, augmenting balance/cosmetics) (2023-2024) [[link](#)]

- Designed, 3D modeled, printed, constructed, and programmed device to augment human balance inspired by animal tails. Made up of vertebrae that move via wires manipulated by pulleys in response to accelerometer data from the sternum & waist. It corrects the user's center of mass if they are falling. Attempted originally to control it via EEG (electroencephalogram) in 2023, but EEG data was too similar. Went through 5 prototypes, finally creating a working invention in October 2024.

Adversity in The Atlas (2023) [[link](#)]

- Programmed a GPS-based video game using the Wherigo engine where players walk around White Rock Lake as their GPS determines where they are in the game's map, a starship. While collecting keys to rectify the ship's course, they must avoid a virtual foe who moves across different locations.

Relevant Coursework

MATH11: *Calculus-Based Prob & Stats:* Used R programming aimed at statistics-related situations in 8 labs, extensive statistics tests (t-tests, chi-squared, etc).

BILD4: *Introductory Biology Lab:* Null and alternative hypothesis testing, poster and publication design, research on academic articles.

VIS163: Design Research & Criticism: Extensive programming in Unreal Engine, collaborative workflow in programming setting.

Research & Technical Experience

Research Assistant (January 2026-current)

Groisman Lab (Biophysics)

- Iterate resin-based 3D printing of fluidic chips used in erythrocyte microscopy.
 - Chips use flow dynamics to guide RBC samples through capillaries to microwells.
- Use Fusion360 CAD and AnyCubic Photon Workshop slicing software to compose printing conditions that improve success rates and continually adjust these conditions.

Volunteer (Summer 2024)

Parkland Hospital Center for Innovation and Value

- Personally trained 82 patients on how to use MyChart, a hospital app that empowers them of their healthcare, analyzing usage data trends with a team.
- Worked as a bilingual instructor, teaching patients who could only speak Spanish.
- Served over 60 hours.

Citizen Scientist (2022-2024)

Texas Stream Team

- Collected bimonthly environmental data over two years to monitor the quality of White Rock Creek, sending data to TXST to advise the EPA on Texas's groundwater health.
- Used chemical reactions and scientific equipment to measure pH, dissolved oxygen, conductivity, turbidity, depth, and temperature, developing skills in precise titrations, scientific analysis, and data interpretation.

Leadership

Copy Editor (2025-current):

Muir Quarterly Satire Newspaper [[link](#)]

- Applied for and was accepted as a Copy Editor, where I edit all our content (~12 pieces per month) under two rounds of review, focusing on grammar and clarity.
- Ensure all our content meets our DEI guidelines.
- Lead printout review and ensure deadline compliance during final paper production sessions.
- Currently written 3 articles of my own (linked above).

Founder and Captain (2021-2025):

St. Mark's Mock Trial Team

- Created the Mock Trial Team in 2021 to continue the passion I had for acting as expert witnesses in middle school, produced graphic and verbal advertisements for team, recruited members, found faculty sponsors, and coached 25 students.

- Lead weekly meetings, organize scrimmages with other schools, and train our members.
- In 2024, I won the singular Best Witness award, and our team placed one away from Regional Finals.

Creative Director (2023-2024)

The Marque Magazine [[link](#)]

- Developed an Orpheus-based theme for the magazine, designed illustrations and text, formatted submissions, communicated with the publisher, and collaborated with others.
- Designed the colorful cover of the magazine, spending over twenty hours creating line art and perfecting colors.
- Created other graphic materials such as back cover, spine, and page decorations
- Wrote the introduction to the magazine and its theme & the dedication.

Teen Leadership Council (2024-2025)

The Dallas Arboretum

- Applied for and was selected as a member of the TLC at my local arboretum, helping guests and staffing events.
- Led 4 group meeting days, recruiting others to help for holiday events.

Awards & Recognition

HSF Scholar

Hispanic Scholarship Fund 2025

- Chosen as one of 10,000 out of over 69,000 applicants to become an HSF scholar for my commitment to improving conditions for Hispanic advancement in education through my future as a researcher/health provider and for my academic accomplishments over high school.

Faculty Special Award

St. Mark's School of Texas 2025

- Received a Special Faculty Award, given to seven students in the Senior class for outstanding performance during high school and character values, specifically for blending fields by being a strong scientist-artist and having a strong work ethic and integrity.

Engineering Sciences Award

St. Mark's School of Texas 2025

- Received this award given to one student for excellence in Engineering. In these classes, I was the only student to develop a working prototype for our biomimicry project in semester I and led in designing our go-cart project in semester II.

National Hispanic Recognition Program & Commended Scholar

College Board 2024

- Recognized for outstanding academic achievement on the PSAT/NMSQT, being one of the top 5,000 Hispanic test takers and one of ~36,000 Commended Students nationwide.

Best Witness

Mock Trial Region 10 Competitions 2024

- Out of 180 witnesses competing in faux court cases, I was chosen as the singular best witness for my dramatic and accurate testimony portrayals on both sides of the docket.

Sociedad Honoraria Hispánica - Miembro

St. Mark's Chapter of Sociedad Honoraria Hispánica 2024

- Inducted into la Sociedad Honoraria Hispánica for being a top student in Spanish throughout high school and dedicating myself to mastering the language.

Other Interests

- Geocaching
 - A game where people search for hidden containers around the world using GPS; I have earned 80+ “favorite points” (the cache is within the top 10% of all caches they’ve found) from local cachers for my 19 interesting and creative hides, some of which have puzzles I’ve created to solve, and others which are hidden in 3D printed containers.
- Sewing & Costume Design
 - Award-winning costume designer (Second Novice, Windblume Festival 2025, for technical fabrication; Second, Triton Gaming Traveler’s Dream Cafe 2026).
- Creative Writing
 - Won Wycott Creative Writing Award by St. Mark’s School of Texas in 2025 by demonstrating exceptional creative writing skills in both English classes and school competitions, being published in our school’s literary magazine *The Marque* all four years of high school.
 - Won the 2025 St. Mark’s Literary Festival Short Story Contest as judged by well-known author R.F. Kuang for my gothic horror piece “Cirque.”
- Visual Arts
 - Primary mediums are watercolor and oil.
 - Won 2024 Excellence in Drawing & Painting Award from St. Mark’s.
 - My work *Roentgenium Lion* featured as St. Mark’s 2024 Winter Holiday Card sent to all faculty, students, and staff.
 - Exhibited at the 2025 Blueprint Gallery expo with my piece *Machinator* that incorporates digital screens that play hypnotic GIFs into the subject’s eyes.
- Programming
 - Created the video game *Adversity in the Atlas*, bots for the messaging app Discord, scripts for the Arduino microcontroller, and more.

- Graphic Design, including 2D & 3D design and CAD software, making and printing models for daily use, such as vases for gardening, puzzles, and modifications to headphones
- Learning new languages (self-taught)

Languages

- English [fluent]
- Spanish [>C1]
- Russian [A1]

*Ratings from CEFR fluency scale
