SUMMARY

MS Computer Science student (4.0 GPA, ASU) with 1.5+ years of professional engineering experience shipping full-stack products and internal tooling in production environments. I build things end to end, fast — from prototype to deployment. Seeking Summer 2026 internships.

EDUCATION

M.S. Computer Science

Arizona State University, Tempe, AZ

Ongoing

4.0 GPA

B.Tech. Computer Science

Dayananda Sagar University, Bangalore, India

May 2023

8.73 CGPA

SKILLS

Programming Languages: TypeScript, JavaScript, Python, Rust, Java, C/C++

Frontend & Full-Stack: React, Vue, Next.js, HTML, CSS

Backend & Systems: Node.js, NestJS, REST APIs, PostgreSQL, MongoDB

DevOps & Tooling: GitHub Actions, CI/CD, Linux/Unix

PROFESSIONAL EXPERIENCE

Apex CoVantage (Remote): Prompt Engineering Consultant

Jun 2025 – Aug 2025

- Responsible for revamping 5000+ rubrics in a benchmark set evaluating LLM performance for a leading AI research lab.
- Led and trained a team of 20+ prompt engineers, ensuring 100% quality and deadline adherence over 3 months.

LaKeel Inc (Tokyo, Japan): Product Development Engineer

Dec 2023 – May 2025

- Worked as a full-stack engineer on LaKeel's industry-leading enterprise low-code platform, contributing across frontend (Vue/TypeScript) and backend services in a production environment.
- Led development of reusable components comprising ~10% of the platform's core component suite; pioneered LaKeel's first internal Design System as a core member of the UX Task Force.
- Independently scoped and delivered an employee leave management chatbot API (NestJS) from design to production, now serving 500+ employees weekly.

Elektrobit (Bangalore, India): UEX Intern

Jan 2022 – Apr 2022

- Led the solo development of a **QML** parser in **Python**, reducing static analysis time of HMI code by up to 30%.
- Collaborated with an international team of automotive software engineers in an Agile environment.

PROJECTS

[tui-jot](#) (Developer Tool, Systems Utility), *Personal Project*

Spring 2026

- Built a lightweight terminal-based (TUI) Markdown editor in Rust with modal editing, wiki-style `[[link]]` graph navigation, and real-time backlink indexing. Featuring a clean-command-driven interface and file-based persistence model emphasizing simplicity and correctness.

[unbored.AI](#) (Python Package, DevTools), *HackASU 2025 Winner*

Fall 2025

- Automated onboarding documentation generator that transforms any codebase into a comprehensive documentation site with AI-generated architecture Overviews.

[Accessible Video Game for Children with an ASD](#), *Undergraduate Final-Year Project*

Spring 2023

- Built a Unity3D computer game application built with accessibility for children with autism spectrum disorders in mind.

ACTIVITIES

AI Scholars — ASU, Tempe, AZ

Aug 2025 – present

- Member of the AI Scholars at ASU — involved in development of innovative AI projects, research, and skill-building.

Student Mentor/Grader — Dayananda Sagar University, Bangalore, India

Jan 2021 – Jun 2021

- Mentored 100+ peers and juniors in the 'Special Topics: Fundamentals of C' programming course, assisted in delivering online lectures, grading quizzes, and answering student questions.
