

Alexandra Maxon

720-876-7141 | alexamaxon@gmail.com | Mission Viejo, CA

OBJECTIVE

Aspiring Quant Research & Data Science Analyst with a strong foundation in mathematics, programming, and financial modeling. Experienced in building time-series forecasting models, RAG-based financial news pipelines, and statistical inference for real-world data. Passionate about applying data-driven methods to markets and macroeconomic signals. Advanced Japanese speaker with cross-cultural experience and a long-term interest in Japan's financial sector.

PROJECT EXPERIENCE

AI-Powered News Summarizer & Q&A (Python)

- Engineered a RAG pipeline that ingests real-time news from Bloomberg articles regularly for fast retrieval.
- Deployed GPT models to deliver daily market briefings with fast retrieval for real-time macro and equity events.
- Delivered a working prototype in <48 hours and applied NLP for financial news intelligence.

Alzheimer's Disease Prediction (R)

- Built machine Logistic Regression to predict Alzheimer's progression using clinical dataset.
- Cleaned and processed patient data using Pandas & R for statistical modeling.
- Visualized risk factors using ggplot2 and interpreted model accuracy with ROC curves.

EDUCATION

University of California San Diego

San Diego, CA

Data Science (Bachelor's)

Expected Graduation Date: June 2027

SKILLS & INTERESTS

Languages: Python, R, Java, C++, SQL, Swift, JavaScript, HTML, CSS

Tools: Tableau, Excel, Git, PowerPoint, AWS, Azure, Pandas, NumPy, matplotlib, scikit-learn

Skills: *CS Concepts:* Data Structures, OOP, Algorithms, Complexity Analysis, OS Basics

AI/Math: Linear/Logistic Regression, Random Forests, Gradient Boosting, Neural Networks, Optimization, Probability Theory, Multivariable Calculus, Linear Algebra

Languages: English (Native), Japanese (Advanced)

Interests: CATAN | Poker | eSports | Golf | PC building | Japanese Language & Culture | Culinary Arts

WORK EXPERIENCE

Memory Labs AI

Online

Freelance Data Science / Statistical Analysis Consultant

Jan -Present 2026

- Reviewed, replicated, and validated statistical analyses to assess methodological soundness, reproducibility, and inference quality
- Evaluated external companies' data exploration, assumptions, and statistical reports for rigor, bias, and interpretability
- Synthesized technical findings into concise summaries highlighting limitations, risks, and recommended improvements

Shrewsberry & Co

Denver, CO

Civil Engineering Intern

2019 - 2020

- Collected and analyzed project data, improving tracking accuracy and reporting efficiency.
- Reviewed engineering documentation, identifying quality gaps and recommending process improvements.
- Partnered with cross-functional teams to evaluate performance metrics, improving project execution.
- Facilitated weekly engineer-manager meetings, delivering data-backed reports that highlighted progress and flagged potential risks.
