EDUCATION

University of California, Los Angeles (UCLA) | *B.S. Computer Science*

Sept 2025 – June 2027 (expected)

Saddleback College | *A.S. Computer Science, Physics, & Mathematics*

Aug 2023 – May 2025

- Dean's List, GPA: 4.0

SKILLS

Programming Languages: Python, C++, Java, JavaScript, TypeScript, ARM Assembly, SQL

Libraries/Frameworks: NumPy, SciPy, scikit-learn, React, Node.js, Express

Tools: Postman, Eclipse, Visual Studio Code, IntelliJ IDEA, GitHub, Jira, PostgreSQL, MATLAB, OpenBCI

Platforms: Docker, Kubernetes, Linux

Strengths: Debugging, testing, Front-end and back-end development, communication, teamwork

WORK EXPERIENCE

Unique Business Systems (UBS) – Constellation Software | *Software Engineering Intern*

April 2024 – Present

- Implement features and maintain UBS commercial software used by enterprise clients.
- Debug production issues with senior engineers and contribute to code reviews and documentation.
- Develop API unit and integration tests using Postman to improve reliability and performance.
- Completed a 12-week intensive Java software development training program.
- Led the release of an AI chatbot to improve customer support efficiency, coordinating with Engineering, Sales, Marketing, and a third-party vendor.
- Researched AI and automation tools to identify opportunities for product optimization.

PROJECTS

Dart Ordering – Full-Stack Ordering Platform (*React, Node.js, PostgreSQL*)

- Engineered the end-to-end customer ordering experience and built an admin dashboard for real-time sales, refund processing, and order tracking.
- Designed and implemented a scalable multi-tenant database schema.

EEG Focus Detection – Brain-Computer Interface Project (*Python, OpenBCI*)

- Lead a team developing a brain-computer interface system to classify focused vs. distracted cognitive states using EEG data from an OpenBCI headset.
- Process EEG signals to extract beta, alpha, and theta bandpowers, construct a focus index, and train an SVM model to classify attention states, with plans to integrate the system into a Chrome extension that nudges users back to focus when distraction is detected.

Mucho Math – Online Learning Tool (*JavaScript, HTML/CSS*)

- Collaborated with a team to develop an online learning platform.
- Led development of an AI assistant powered by the OpenAI API that supported students in math and physics by providing targeted guidance and improving learner confidence.

LEADERSHIP AND ACTIVITIES

- CruX Neurotech Organization Project Lead — UCLA
- Vice President, CodeBase Web Development Club — Saddleback College
- Society of American Military Engineers — Saddleback College
