EDUCATION

University of California San Diego

Master of Science, Computer Science, **GPA: 4.0/4.0**

San Diego, USA

09/2025 - 06/2027

Focus Areas: Artificial Intelligence, Machine Learning and Generative AI, LLM Systems, Cloud Computing

Ramaiah Institute of Technology

Bachelor of Engineering in Computer Science and Engineering, **GPA: 9.44/10**

Bangalore, India

08/2017 - 07/2021

TECHNICAL SKILLS

Languages: Python, C++, Java, JavaScript, TypeScript

Tools & Frameworks: Pytorch, Tensorflow, Langchain, Pydantic, ReactJS, NodeJS, Flask, Vector Database, DBMS, Pinecone, AWS Aurora, MySQL, Kafka, Redis, Docker, Kubernetes, AWS, Git, Linux, Bash, Mockito, Grafana, Prometheus

Concepts: Data Structure & Algorithms, System Design, NLP, Distributed Systems, Operating Systems, Object Oriented Programming, Databases, Microservices Architecture, Event-Driven Architecture, CI/CD pipelines, Agile Development

PROFESSIONAL EXPERIENCE

Lab of Emerging Intelligence UCSD, Applied ML Engineer

09/2025 - Current

- Developing question generation and evaluation pipeline for Smart Learning Hub using structured outputs enabling curriculum question generation at scale.
- Analyzed **RQUGE** and **LLM-Judge** based evaluation methods, reducing reliance on manually constructed test datasets and lowering sensitivity to semantic variation.
- Building multi-agent orchestration framework to automate the academic workflows using MCP servers and Claude Skills.

JP Morgan Chase & Co., Software Engineer-II, Bangalore

03/2021 - 09/2025

- Spearheaded a team of six engineers to develop **Incident Solution Recommender System** using data from major incidents. The solution matched the incidents using fuzzy string matching and similarity scoring pipeline. This reduced the avg. resolution time from **30 mins** to **4 mins**, helping stakeholders across LOBs.
- Designed and developed Buy Now-Pay Later Card Lending product, with a time to interaction of **2 seconds**. Owned SDLC & implemented **Horizontal Pod Autoscaling**, **Chaos Engineering** improving application's performance.
- Built Benefits & Rewards experience with **AWS migration** from monolithic to **micro-services architecture**, resulting in higher **TPS support of 75**. Optimized the load time by lazy-loading and filtering of 1000+ benefits.
- **Awards:** Winner, **Chasers Award**, **Innovation** category(03/2023); Team Mentor, Tech For Social Good(09/2022); Winner, **GOTF(Guard of the Fort)** awards(07/2022)

PROJECTS

TutorAI - RAG-based AI Assistant [\[Link\]](#)

09/2024

Langchain, Ollama, Vector Database, Flask, React

- Built **RAG** model, that provides context-based answers from the uploaded PDF document. The application provided **multi-LLM support** with loose-coupling from 3 models: OpenAI's GPT, MistralAI, and Llama.
- TutorAI supports offline functionality by running lightweight LLMs locally, ensuring accessibility without reliance on connectivity.

Vigil: Anomaly Detection & Emergency Alert System [\[Link\]](#)

07/2020

Keras, TensorFlow, FedML, Flask, Android, GCP

- Built **Multiple Instance Learning** model, on UCF Crime Dataset, with **1.9** as false positives rate. The model used responsive web-app and android app for user interface.
- Trained in **federated client** setting with zero transfer of training data, achieved accuracy of **83.34%**, enhanced as compared to centralized approach of 81.29%.

PUBLICATIONS & CERTIFICATES

- Understanding Federated Learning & Its Applications in Video Anomaly Detection, IJEAST 2022 [\[Link\]](#)
- A Utility System for Farmers to Build Decision Support System on Agrometeorological Data, ICCIN, Springer, 2021 [\[Link\]](#)
- Data Reduction Techniques in Fog Data Analytics for IoT Applications, FDA for IoT Applications, Springer, 2020 [\[Link\]](#)
- Authorship Identification Using Supervised Learning and n-Grams for Hindi Language, Journal of Computational and Theoretical Nanoscience, 2020 [\[Link\]](#)

Certifications: AWS Cloud Practitioner(2022); Docker & Kubernetes, Microfocus(2020); Neural Networks and Deep Learning, DeepLearning.AI(2019); Machine Learning, Stanford, Coursera(2018)
