

EDUCATION

Master of Science in Business Analytics, Rady School of Management
University of California, San Diego, CA

05/2026

Bachelor of Computer Science Engineering

MEPCO Schlenk Engineering College, India

05/2022

- Scholarship for Academic excellence

EXPERIENCE

IT Engineer, Honeywell Technology Solutions, Madurai, TN, India

06/2022 - 12/2024

A significant engineering tech arm in India focusing on aerospace innovation

- Drove requirement-to-deployment delivery of a **cockpit testing platform** across 4 aircraft programs, enabling scalable automated flight simulations through close collaboration with systems and verification teams
- Led onboarding and training for 10 team members, strengthening team productivity, technical consistency, and stakeholder communication
- Coordinated CI/CD pipeline enhancements and release coordination for a cockpit testing platform leveraged by multiple teams across 4 aircraft programs
- Developed **optimized Python automation scripts to parse simulator outputs**, streamline workflows, and eliminate repetitive engineering tasks
- Awarded the "**Drive Accountability Culture**" recognition for **technical ownership, delivery excellence, and automation-driven efficiency improvements**

PROJECTS

Student, Sequential Item Transition Modeling for Grocery Reorders, Recommendation Systems, Rady School of Management

12/2025 - 12/2025

- Analyzed 3M+ **real-world grocery transactions** using Python (Pandas) to clean, join, and transform raw order data into structured analytical datasets
- Built an item-to-item transition analysis framework by computing product-to-product transition probabilities from sequential order data, **generating Top-5 ranked** product recommendations
- Applied **feature engineering**, aggregation, and ranking logic across 3M+ grocery orders transactions to identify repeat-buying and co-purchase patterns
- Conducted **sequential and time-based analysis** leveraging features such as order position and days since prior order across 200K+ users, facilitating interpretable insights into customer shopping behavior

Student, Purchase Order & Invoice Analytics using Snowflake & Python, Academic Project, SQL & ELT, Rady School of Management

07/2025 - 07/2025

- Integrated financial, supplier, and weather datasets using **Python and Snowflake** to enable cross-domain analysis
- Built SQL logic to calculate purchase order totals and surface **invoice discrepancies at scale**, reducing manual reconciliation effort by ~30%
- Implemented **SQL transformation layers** within the ETL pipeline, supporting automated, repeatable analytics at scale

SPECIALIZED SKILLS

- **Languages/Coding:** Python, SQL (Advanced), ETL, Java, JavaScript, MATLAB
- **Tools:** SQL Developer, Jira, Postman, Jenkins
- **Certifications:** MongoDB Basics, Hadoop 101(IBM)
- **Projects:** <https://github.com/anishashruti>

PROFESSIONAL AFFILIATIONS & LEADERSHIP

- Served as **Vice President of Outreach**, Rady Product Management Club
— led outreach initiatives and organized events
- Awarded Rady School of Management – **MSBA Scholarship**

12/2025 - Present

12/2024
