EDUCATION

University of California, San Diego

2028

Bachelor of Science in Mathematics and Economics, GPA: 3.94

La Jolla, California

Mira Loma High School

International Baccalaureate Diploma, Valedictory Scholar GPA: 4.65

Sacramento, California

COURSEWORK

Honors Linear Algebra, Principles of Data Science, Analysis of Economic Data

EXPERIENCE

Seed-round B2B Consumer Tech Startup (NDA)

2026 – Current

Consulting Internship

- Consulted with executive board to **identify key growth areas** and plan market research initiatives.
- Developed and conducted in-person **consumer surveys** targeting a variety of user demographics at multiple locations.
- Compiled results into a **final deliverable** covering initial targets, successful project operations, and future initiatives.

Airtasker

2026 – Current

Marketing and Operations Internship

- Conducted in-person marketing within local community as part of UCSD student ambassador program, targeting growth in app downloads and task postings and completions.
- Worked on capstone project to **organize and visualize data** from student ambassador program to identify strengths, target weaknesses, and evaluate success.

Seaside Sustainability

2024 – 2025

Business Operations Internship

- Conducted 14+ hours/week of **market research** to curate personalized outreach emails to secure non-profit funding.
- Underwent a week long training program developing proficiency in workplace tools: **Excel, Apollo, Trello**.

PROJECTS

UCSD Basketball Player Impact | *Python, VS Code, GitHub*

2026

- Developed a **logistic regression** model to quantify and compare the impact of individual player performance (P/R/A) on team win probability using half-level college basketball game data.
- Engineered and evaluated performance metrics, which showed **0.89 accuracy score**, **sub 0.5 log-loss**, and **ROC AUC of 1**.
- Visualized analytical insights by developing models and plots through **various python libraries**: matplotlib, scikit-learn, seaborn.

Credit Card Spending Prediction | *RStudio, GitHub*

2025

- Developed a model to **predict sample consumer credit utilization ratios** based on factors such as age, education level, marital status, revolving credit limit, etc.
- Model resulted in a **40+ percent reduction in error** relative to baseline.
- Gained experience in using R for data scraping and cleaning, **linear regression modeling**, statistical score interpretation (**RMSE**), and creating plots for result visualization.

AWARDS

Business Professionals of America

2024

National Leadership Conference

Chicago, Illinois

- Created an economic research case identifying **market monopolies** that achieved **4th place** out of 57 international competitors that qualified for the final round.
- Led a team for the Daniel's Fund Ethics Initiative competition to develop a report for an ethical workplace analysis case, achieving **top 20/100+ teams**.

National Economics Challenge

2024 – 2025

California Council on Economic Education (CCEE)

San Francisco, California

- **2-time** state finalist: **top 10/100+ teams**, consisting of **500+ competitors** in Northern California.
- Perfect individual qualifying score **300/300**.
