

Atharv Gupta

Fremont, CA | (408)-387-2164 | atharv.gupta124@gmail.com | [LinkedIn](#) | github.com/AtharvG-124

EDUCATION

University of California, Santa Cruz

Expected Graduation - June 2026

- B.S. in Computer Science, concentration in Software Engineering; planning to pursue M.S. in Computer Science
- Relevant Coursework: Artificial Intelligence, Intro to Data Structures, Intro to Algorithms, Computational Models, Principles of Computation and System Design, Computer Systems and C programming

SKILLS

- **Programming Languages:** Python, Java, C, JavaScript, HTML, CSS, Tailwind CSS, TypeScript, SQL, Perl
- **Technologies:** Angular, React, Node.js, Next.js, Linux, TensorFlow, Firebase, JQuery, AWS, PyGame, AWS Machine Learning, Figma, Pinecone, MongoDB, QA Testing, Terraform, RHEL, CI/CD, Docker, Packer, Ansible, Cloud-Init, SUSE/SLES, Libvirt, Apache Airflow, DevOps, Azure, Jenkins, Kubernetes, Shell Scripting, AWS Cloud Practitioner (In Progress Certification)

WORK EXPERIENCE

IBM

June 2025 - December 2025

Backend Engineering Intern

Tucson, AZ

- Automated the provisioning and configuration of virtual machines using Terraform, Libvirt, and Cloud-Init, including a Python script to automate node_exporter configuration, reducing setup time by 50%, ensuring consistent deployments.
- Implemented and configured Prometheus/Grafana for real-time monitoring and visualization of node performance metrics, enabling proactive system analysis and troubleshooting, and automated virtual machine cluster setup for GPFS by wrapping two python scripts reducing setup time by 33%.
- Contributed to the automation of the setup process of encryption servers allowing for faster setup by 20%, including IBM GKLm and CipherTrust, enhancing data security and compliance across systems.

Forward

September 2023 - June 2025

Research and Fullstack Software Engineering Intern

Santa Cruz, CA

- Researched and evaluated AI models, including LMV4 and similar models, to identify the best integration and application development solutions.
- Improved and implemented web page functionalities using Next.js, HTML, CSS, and JavaScript, resulting in 15% faster load times and ensuring a user-friendly interface.
- Integrated AI model's data into the web application, significantly enhancing functionality and user experience by providing intelligent and data-driven features for users.

Overseas Organization for Better Bihar (O2B2)

August 2022 - May 2024

Fullstack Developer

Fremont, CA

- Constructed and implemented a responsive web application using Angular 14, HTML, CSS, TypeScript, and JavaScript, delivering a seamless user experience across various devices and screen sizes.
- Integrated Firebase to efficiently manage user data, providing real-time updates and secure data handling for 10K+ users.

PROJECTS

SlugScheduler | (Python, TypeScript, CSS, JavaScript)

[Github](#)

- Developed a Python web scraper to extract course and professor data from online sources, including Rate My Professors and the UCSC course catalog, and stored the information in MongoDB database.
- Redesigned the frontend using Next.js, improving UI/UX with a modern, responsive design and seamless navigation for course selection and scheduling.
- Connected the frontend to the backend and implemented a ChatGPT API for intelligent schedule generation.

AI-Powered Web Scraper with Dynamic Content Parsing | (Python)

[Github](#)

- Built an AI-powered web scraper in Python for dynamic content extraction using custom prompts and URLs.
- Integrated advanced tools including Selenium, BeautifulSoup, and LangChain, increasing content extraction efficiency by 50% compared to traditional scraping methods.

LEADERSHIP/ACTIVITIES

SlugAI Project Manager - Inspirame | (React, Java)

April 2025

- Led a team of 5 developers in building an AI chatbot solution for a startup client using React and Java.
- Coordinated bi-weekly meetings with the client to align deliverables and track team progress. Managed task assignments, ensured timely completion of milestones, and facilitated integration between frontend and backend components.
