EDUCATION

University of California San Diego, La Jolla, CA

August 2024 - Present

- BS in Mathematics - Applied
- Date of graduation: June 2028
- Relevant Coursework : Introduction to Programming and Computational Problem-Solving: Accelerated Pace, Calculus 1-3, Differential Equations, Mathematical Reasoning, Applied Linear Algebra

Orthopaedic Hospital Medical Magnet High School, Los Angeles, CA

August 2020 - June 2024

- GPA: 3.9
- Superintendent Honor Roll
- Principal's Honor Roll
- Varsity Boys Division IV Cross Country 2nd Place Team
- AP Computer Science Principles, AP US History, AP Environmental Science, AP Statistics, AP Psychology

WORK EXPERIENCE

UC San Diego Summer Bridge, Peer Navigator, La Jolla, CA

April 2025 - September 2025

- Mentored and supported incoming first year students during UCSD's Summer Bridge Program to ensure smooth academic and social transition to university life.
- Provided one-on-one guidance on study strategies, campus resources, and student engagement opportunities.
- Collaborated with pro-staff to plan and lead workshops, community-building events, and discussion sessions.
- Fostered an inclusive, encouraging environment for first-generation and underrepresented students entering UC San Diego.

EXTRACURRICULAR EXPERIENCE

USC Neurocamp, Los Angeles, CA

October 2022

- Explored brain biohacking and participated in brain health activities.
- Engaged with peers through interactive neuroscience workshops, fostering curiosity and enthusiasm for brain science.

UCLA City Lab, Los Angeles, CA

April 2023

- Engaged in hands-on biotechnology lab experiences, gaining practical skills.
- Worked with UCLA mentors to explore real-world biotechnology techniques and to understand the scientific process.

Kid City Mentorship Program, Los Angeles, CA

August 2023 - June 2024

- Experienced personal growth and effective communication with a mentor.
- Attended workshops, events, and meetings to prepare for college applications.

UCSD Omics Odyssey Hackathon, Team Member, La Jolla, CA [View Presentation](#)

May 2025

- Collaborated with my team in the 2025 undergraduate bioinformatics club hackathon to develop a random forest model that predicts the disease of a patient from their cerebrospinal fluid scRNA-Seq data
- Web scraped 1000+ cerebrospinal fluid scRNA-Seq data from the NIH's publicly available Gene Expression Omnibus (GEO) datasets
- Utilized the Anndata and Scanpy python libraries to preprocess and visualize the scRNA-Seq data using UMAP
- Trained a scikit-learn random forest classifier model with the scRNA-Seq data to diagnose patients out of five distinct categories (Healthy, Idiopathic Intracranial Hypertension, Multiple Sclerosis, Parkinson's Disease, or COVID 19) and achieved ~70% accuracy

SKILLS AND QUALIFICATIONS

- Programming: Proficient in Python and Java; familiar with R, MATLAB, and Stata
- Computer Applications: Proficient in Google Workspace (Docs, Sheets, Slides, Drive); beginner in audio editing
- Interpersonal: Resilient, Diligent, Attentive, Realistic, Adventurous, Willing to Learn
