EDUCATION

University of California, Santa Barbara

Santa Barbara, CA

B.S. in Statistics and Data Science & B.A. in Economics

June 2026

- Cumulative GPA: 3.93/4.00 (Dean's Honors)
- Relevant Coursework: Statistical Data Science, Machine Learning, Data Structures & Algorithms, Regression Analysis, Computation in Statistics, Stochastic Processes, Probability and Statistics

WORK EXPERIENCES

Data Analyst Intern

September 2025 - December 2025

Integra FEC

Austin, TX

- Established PDF parsing scripts using Regex, OpenCV, and OCR tools to extract financial information from 50,000+ hand-written records for fraud investigation, forensic analysis, and financial research
- Performed blockchain analysis with Chainalysis, blockchain explorers, and BigQuery to trace sources of flagged crypto funds worth over 700,000 dollars
- Collected, extracted, and analyzed 70+ SEC N-CSR Filings and 100+ Pension Funds Fixed Income Holdings to support research in potential financial fraud on Auto Loan and Commercial Mortgage Backed Securities

Data Science Intern

June 2025 - September 2025

Southern California Edison

Pomona, CA

- Optimized an XGBoost time-series model predicting hourly electricity load across 500,000+ transformers; reduced MAP error by 0.3 through feature engineering, hyperparameter optimization, and cross-model validation
- Developed Scope Mapping Tools for 2,300+ projects that enable System Planning Engineers to bundle equipment upgrades and save millions in annual electricity system planning cost
- Designed several DGI tracker dashboards using Figma to support the development of System Planning & Engineering Execution dashboard for over 1000 electrical engineers by integrating load flow requirements

Data Analyst

April 2023 - Present

UCSB Professional and Continuing Education

Santa Barbara, CA

- Built a LLM-powered sentiment pipeline using OpenAI API to analyze 30,000+ student support emails across five certificate programs to optimize department customer services
- Cleansed and generated 100+ reports on enrollment counts, empty seats, unit counts, and course approvals to guide resource allocation, scheduling, and decision-making for department program managers
- Deployed MongoDB clusters storing 100,000+ archived support tickets for scalable querying and analytics
- Automated institutional file and data retrieval workflows from Destiny Solutions, Zoho Tickets, and MongoDB with Selenium and Destiny One APIs to saving 30+ hours of manual effort per month

Data Writer

October 2023 - June 2024

UCSB Daily Nexus News

Santa Barbara, CA

- Published 3 articles for UCSB's largest school newspaper to support community commentary of 50,000+ people
- Applied visualizations using Tableau, Plotly, and DataWrapper to translate data into accessible narratives

PROJECTS

Credit Scores Prediction | R, ML Classification, Tidyverse, Tidymodels, EDA, ggplot

- Built a multi-class machine learning classification models to predict an individual's credit scores; achieves a ROC-AUC score of 0.9 and a model accuracy of 0.78 by applying K-Fold Validation, PCA, and parameter tuning

High Hopes, Modest Results: The Limited Impact of CA's Minimum Wage Increase | R, econometric, ggplot

- Won 3rd place in UCSB's 2025 Economics DataHack for delivering a policy analysis that raised concerns on the limited impact of California's rise in minimum wage on poverty reduction and public assistance reliance

PROFICIENCIES

Programming Languages: Python, R, SQL, Basic HTML/CSS

Data Skills: Data Analysis & Visualization, Database Management, Machine Learning, Data Extraction, LLM Integration, Data Automation, Web Scraping, Optical Character Recognition (OCR)

Toolbox: Git, Tableau, MySQL, MongoDB, Docker, LaTeX, Figma, Snowflake, Google Analytics4, Google Tag Manager
