

CESAR VILLEGAS

PROFILE

First-year UCSD data science major focused on machine learning, optimizing systems and habits with the same rigor used to perfect code.

EDUCATION

BA Data Science | UCSD

Sept 2025 - Present

- Current GPA: 3.7

PROJECTS

HDSI Industry Mentorship Project

Working with an industry professional from ASML to build an AI agent that connects to an open-source LLM using Streamlit for the interface and SQLite for querying interaction data.

Pulp

Built a Next.js digital notes app featuring SVG-filtered handwritten text, AI-powered sketch generation, tiered usage limits, task blockers for productivity, and gamification elements to boost engagement. MVP has been launched and construction is still underway.

Wire Box

An AI automated workflow for local mechanics shops. Worked with a co-founder to create an interactive chatbot for customers, personalized integration with calendars, SMS, email, etc. increasing client retention.

SKILLS

- Python, SQL, Java
- NumPy, Pandas, Matplotlib
- Time-series analysis & alignment
- Scikit-learn
- Cross validation
