I am an exceptionally passionate student at the University of Washington with a deep love for the realm of computer science and machine learning. As a data science intern at a real estate company, being experienced in leading a team on ML drug discovery with contributions to research papers, and being actively involved in a medical/tech non-profit, I am dedicated to making a positive impact. I consider myself a creative, innovative, and adept problem solver, eager to explore opportunities that allow me to continually learn and contribute to the fields of Machine Learning, Data Analytics, Statistical Science, and Computer Engineering.

Experience

Data Science Intern - Bay Area Contractors

June 2024 - Present

- Paid intern using machine learning to drive real estate profits.
- Developed predictive models that identified profitable opportunities, directly contributing to revenue growth and operational efficiency within the company.
- Combined finance and ML skills to analyze market trends and optimize portfolios.

Research and Development, Aspiring Scholars Directed Research Program

Aug 2021 - August 2024

- Lead ML Architect in collaboration with college professors and high school students for machine learning applications within drug discovery
- Contributed to published work in IEEE International Conference on Bioinformatics and Biomedicine, and Journal of Student Research
- fMRI research with Stanford researcher, analyzing brain imaging data and exploring musical genre perception

Co-founder, Chief Technology Officer - SeroMed Foundation

July 2023 - Present

- International organization, developing people's knowledge about health and medical science, and providing aid for essential medical care to impoverished regions, partnership with CMF, Chisei, Chipotle, and others.
- Researched and got the company qualified for 501 (c)(3) Status
- Leading the technology department of the non-profit, creation of technological assistance to impoverished regions

Cofounder, Lead Tech Officer - HackTheLab Hackathon

June 2023 - November 2023

- Created website for the hackathon, utilizing HTML, JS, and CSS
- Managed the technology department for the hackathon, ensuring a great environment
- Mentored and presented machine learning presentations to middle and high school students

Co-founder, President, Game Development Club, Homestead High School

December 2022 - Present

- Host weekly meetings at our school with 15-20 participants in each meeting
- Educate members on C#, Unity, asset creation, and general Game Development

Homestead High School Officer Positions

May 2023 - Present

- Cycling Club
 - Host monthly meetings at our school with 10-15 participants in each meeting
 - Help promote an active and healthy lifestyle at our school, hosting monthly bike rides
- Shogi Club
 - Host weekly meetings, teaching students shogi and hosting shogi tournaments

Achievements

State/National (FBLA)

- 2022 State Champion - Data Analysis
- 2022 Second Place Nationals - Data Analysis
- 2023 State Champion - Mobile Application Development
- 2023 Seventh Place Nationals - Mobile Application Development
- 2024 State Champion - Computer Game and Simulation

Other

- USACO Gold Competitor
- 1600 SAT
- 2023 AMC 12 - Distinction (Top 5%)
- Synopsys Science Fair 2023 Competitor - Analyzing Pathogens in Water Through Machine Learning Models
- FRC Team World Champion Qualifier, Chezy Champs 1st place

Education

Homestead High School

2021-2025

- GPA UW: 3.97 W: 4.55
- 14 AP and Honors Courses

Skills

- C++ - USACO Gold Competitor
- C# - Unity Game Developer
- Java - 5 on APCS A
- Python - Data Science Projects
- Tensorflow
- Swift - Mobile Application Development
- HTML, CSS, JS - Website Development
- Data Visualization
- Analytical and Research Skills
- Competitive Programming

- Modeling: Linear and logistic regressions
- Complex Problem Solving
- Software Development Life Cycle
- User Acceptance Testing
- Public Speaking
- Presentations
- Multimedia Marketing
- Photo design and editing
- Competitive Mathematics
- Data Science
