

# DYLAN DALE

dylandale@berkeley.edu | (669) 649-8102 | [linkedin.com/in/ddale/](https://www.linkedin.com/in/ddale/) | [github.com/ddale314](https://github.com/ddale314)

## EDUCATION

---

### UC Berkeley

*B.A. Data Science*

**Berkeley, CA**

*Expected May 2029*

- **Relevant Courses:** Multivariable Calculus, Linear Algebra, Discrete Math and Probability Theory, Data Structures, Structure and Interpretation of Computer Programs, Foundations of Data Science, Deep Learning for Computer Vision

### Homestead High School

*GPA: 4.0, SAT: 1590*

**Cupertino, CA**

*August 2021 - June 2025*

## PROFESSIONAL EXPERIENCE

---

### Laboratory of Dr. Yoshiki Murakami, Faculty of Dentistry, Asahi University

*Data Analysis Intern*

**Sunnyvale, CA**

*June 2024 - August 2025*

- Investigated relationships between miRNA expression levels and the hepatitis B virus to identify biomarkers in patients who improve without specific treatment
- Applied statistics and data science based techniques such as t-test, ANOVA, and PCA to extract significant miRNAs
- Developed linear regression and SVM-based machine learning models using **scikit-learn** to classify virus groups and identify significant clinical factors, applied cross-validation and hyperparameter optimization
- Created data visualizations and in-depth documentation for use in journal paper

## PROJECTS & OUTSIDE EXPERIENCE

---

### SaveBites

*Team Project*

**Berkeley, CA**

*September 2025 - December 2025*

- Designed and implemented web application for recipe generation and food consumption optimization using **React**, **JavaScript**, and **CSS**
- Developed LLM-based pipeline in **Python** for accurate recipe recommendation based on detailed user preferences
- Integrated frontend and LLM pipeline with MongoDB, Node.js, and RESTful API backend

### Independent Research

*Personal Project*

**Sunnyvale, CA**

*December 2023 - March 2024*

- Developed novel method of detecting epileptic seizures within patients using EEG data using **pytorch**
- Applied machine learning models such as autoencoders and liquid time-constant networks to remove artifacts in EEG data and identify seizures; demonstrated the viability of the latter model in real-world applications
- Documented and presented results at regional science fair, received award

## ACTIVITIES & LEADERSHIP

---

### CALICO Informatics Competition

*Problem Writing Officer*

**Berkeley, CA**

*September 2025 - present*

- Wrote and tested unique problems for programming competition with **2200+** participants worldwide
- Designed problem solutions and test case generation algorithms in **Python**, **C++**, and **Java**
- Managed contest day logistics and problem clarifications, contributed to cheating detection efforts

### San Francisco Japanese School

*ASB Representative*

**Cupertino, CA**

*April 2023 - March 2025*

- Served as student government representative at language school of ~300 students
- Planned schoolwide events, spoke at assemblies and prospective student events
- Organized and led fundraiser for natural disaster victims in Japan, raised **\$2000+**

## SKILLS & INTERESTS

---

**Skills:** numpy, scipy, pandas, matplotlib, pytorch, scikit-learn, Jupyter, git

**Languages:** Python, Java, C++, JavaScript
