EDUCATION

University of California, San Diego*San Diego, CA*
B.S. Probability & Statistics; Minor in Data Science
Sept. 2023 – June 2027

Relevant Coursework: Foundations of Data Science (DSC 40A), Principles of Data Science, Programming & Data Structures for Data Science, Statistical Methods, Mathematical Reasoning (MATH 109), Econometrics (ECON 120A), Data Analysis & Design for Biologists (BILD 5)

TECHNICAL SKILLS

Languages & Libraries: Python (pandas, NumPy, scikit-learn, matplotlib, requests), R

Tools & Platforms: Microsoft 365 (Excel, Word, SharePoint, Teams, OneDrive), Google Workspace, Jupyter Notebooks, Google Colab, GitHub, LaTeX (Overleaf), Canva

Data & AI: Predictive Modeling, Exploratory Data Analysis, Feature Engineering, Data Pipeline Automation, REST API Integration, Geospatial Visualization (geopy, GeoPandas)

Languages: English (Native), Spanish (Fluent)

EXPERIENCE

DS3 Hackathon – UC San Diego*San Diego, CA*
Software Developer & Data Science Presenter Apr. 2025

- Built an end-to-end predictive ML pipeline in Python using scikit-learn to forecast movie ratings across 900K+ records, applying feature engineering and one-hot encoding of categorical variables
- Performed exploratory data analysis using pandas and matplotlib to surface trends in how director, genre, and runtime impact audience ratings
- Deployed the model as an interactive Gradio application, translating complex model outputs into an accessible tool for non-technical users
- Presented methodology, findings, and business implications to a panel of judges, demonstrating ability to communicate technical work clearly

Nueva Herencia – UC San Diego*San Diego, CA*
Co-Chair / Secretary Chair Jun. 2025 – Present

- Engineered a Python automation bot that reads structured CSV data and dispatches targeted member communications via the GroupMe REST API, reducing manual outreach time

- Built and maintained data pipelines using pandas to track member attendance, retention, and participation trends across multiple Google Forms sign-in datasets
- Developed an in-progress geospatial visualization tool using geopy and GeoPandas to geocode and map member hometown data onto a U.S. Census basemap
- Maintained accurate records, managed scheduling, and produced data-driven reports to support executive board decision-making across a 50-member organization
- Co-led weekly board meetings and oversaw onboarding for six board members, demonstrating strong organizational and cross-functional communication skills

PROJECTS

NH Member Hometown Map*UC San Diego Independent Project*Fall 2025 – Present

- Processing Google Forms sign-in data from 7 GBMs using pandas, geocoding hometown strings to lat/lon coordinates via the Nominatim API, and rendering interactive maps with GeoPandas and a Census TIGER basemap

ACTIVITIES & INTERESTS

Nueva Herencia de UC San Diego, Minority Business Association, Society of Hispanic Professional Engineers, TRIO Student Support Services Program
