EDUCATION

University of California San Diego

La Jolla, CA

B.S. Computer Science | Regents Scholar | GPA: 3.94

2024–2028

Relevant Coursework: Computer Organization, Advanced Data Structures, Design & Analysis of Algorithms, Theory of Computability, Software Engineering, Introduction to Artificial Intelligence

EXPERIENCE

Information Technology Support Specialist

May 2025 – Present

UC San Diego Information Technology Services

La Jolla, CA

- Administer user and device accounts in Active Directory (ADUC), including account provisioning, deactivation, group membership updates, and access changes within an enterprise directory supporting tens of thousands of users and devices
- Support access management workflows at scale, applying security-first and least-privilege principles in daily operations.
- Diagnose and resolve hardware, OS, printer, and peripheral issues through in-person and remote support for thousands of end users
- Image, configure, and deploy Windows and macOS systems for faculty and staff across multiple campus departments

Volunteer Tutor

Jan. 2023 – June 2024

San Diego Refugee Tutoring

San Diego, CA

- Provided individualized English and math tutoring to 10+ elementary-aged refugee students
- Supported students' transition into the U.S. education system through mentorship and consistent academic guidance
- Collaborated with program coordinators to adapt lesson plans based on student progress

Computer Science Program Participant

Aug. 2024 – Sep. 2024

Summer Program for Incoming Students (SPIS), UC San Diego

La Jolla, CA

- Built foundational Python skills through labs involving image manipulation, algorithmic problem-solving, web applications, and introductory machine learning
- Collaborated with 50+ peers and faculty through lectures, labs, and discussions on computer science research and career pathways

PROJECTS

Compliance Autofill Engine (CAfE) | *Python, FastAPI, AWS Bedrock, LLMs, React*

Jan. 2026

- Built a full-stack AI-assisted system that transforms advisor meeting notes and client profiles into structured, audit-ready compliance documentation, reducing manual write-up time from ~ 20 minutes to ~ 3
- Implemented document ingestion, retrieval over compliance guidance, and LLM-driven structured JSON generation with human-in-the-loop review to improve consistency and completeness

Flower Species Classification | *Python, TensorFlow, CNNs, HTML/CSS, JavaScript*

Sep. 2024

- Designed and trained a convolutional neural network in TensorFlow to classify 14 flower species, achieving approximately 80% accuracy on validation data
- Preprocessed and augmented image data to improve model generalization and reduce overfitting
- Integrated the trained model into a web-based interface using HTML, CSS, and JavaScript to support image uploads and real-time predictions

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript, HTML/CSS, R, Assembly

Developer Tools: Git, VS Code, Google Colab, Maven, LaTeX, MATLAB

Libraries: TensorFlow, pandas, NumPy, Matplotlib, React

Systems & Platforms: AWS, Active Directory, Windows, macOS, ServiceNow

Spoken Languages: English, Spanish
