SUMMARY

Motivated and adaptable student with a strong foundation in mathematics, programming, and analytical problem-solving. Proficient in Microsoft Office and Google Workspace, with leadership experience and excellent communication skills. Eager to contribute my skills and adaptability to internship opportunities in Technology and Data Science, while gaining valuable experience and building a strong foundation for long-term professional success.

EDUCATION

University of California, San Diego (UCSD)

Expected June 2028

Bachelor of Science, Data Science | Business Economics | Cumulative GPA: 4.0/4.0

SKILLS

Programming & Tools: Python (pandas, NumPy, scikit-learn), Java, HTML/CSS, Git, GitHub, Jupyter

Data Visualization: Streamlit, Matplotlib/Seaborn (implied from Python), Excel, Google Sheets, Canva

Productivity: Microsoft Office, Google Workspace

Languages: English (fluent), Mandarin (native)

AWARDS & HONORS

Provost Honors, Warren College, UC San Diego | Fall 2024 – Winter 2026

Awarded quarterly for academic excellence (UC GPA ≥ 3.5 , 12+ graded units)

4th Place, Beginners' Programming Competition 2025, Women in Computing (WIC)

RELEVANT EXPERIENCE

Tutor, Halicioğlu Data Science Institute, UCSD

September 2025 - present

- Tutored for UCSD's DSC10: Principles of Data Science, reinforcing core concepts such as regression, permutation testing and Python programming in Jupyter Notebooks.
- Managed course website content through GitHub, including releasing weekly labs and midterm/final projects.
- Led weekly course discussion, pod/quiz meeting, hosted office hours and one-on-one quiz/midterm review to support student learning.
- Graded assignments, labs, quizzes, and exams to provide consistent and constructive feedback.

Data Scientist Intern, IDX Exchange (Remote)

Summer 2025

- Engineered features and cleaned real estate transaction data from CoreLogic's Trestle API, performing exploratory analysis to inform model development.
- Built, evaluated, and optimized multiple regression models (e.g., Linear Regression, Random Forest, XGBoost), selecting the final model based on key metrics (R-squared, MAE).
- Participated in weekly team reviews, presenting modeling strategies and incorporating feedback from senior data scientists to refine the predictive pipeline.
- Documented the model development process and established best practices to ensure reproducibility and team knowledge sharing.

PROJECT EXPERIENCE

Student Researcher, Data Science Teaching & Learning Lab(DSTL), UCSD

October 2025 - present

- Developed a JupyterLab extension for UCSD's DSC10 (Data Science) course, serving 200+ elementary-level students with coding assistance via a Python backend and TypeScript/React frontend.
- Engineered a dual-mode assistance system ("tutor" and "ChatGPT" modes) that customizes the AI's guidance style, and designed the system to maintain conversation context while integrating with the active notebook for code-aware support.
- Enhanced Gen AI interaction by implementing tool-calling functionality (e.g., read_file) with secure directory whitelisting, and designed prompt strategies to guide LLMs in invoking tools only when required, reducing hallucinations and improving response reliability.

Creator, Presenter, "Pokémon", DS3 DataHacks 2025

April 2025

- Developed a data-driven Pokémon team recommender system using Python and Streamlit, enabling users to input preferences (eg. high attack, balanced stats) and receive optimized team suggestions based on ranked attribute analysis.
- Engineered custom scoring algorithms to evaluate and prioritize Pokémon from Kaggle datasets.
- Designed an interactive web interface with file input flexibility or manual entry.

Content Creator, Speaker, Translator, FindingSchool Live Stream

February 2024 - March 2024

- Collaborated with the Mounds Park Academy (MPA) admissions office to develop a virtual tour video, enhancing outreach to prospective international students in China.
- Translated school materials into Chinese and developed a virtual tour video, improving accessibility for non-English speaking audiences.
- Represented MPA as a student ambassador by hosting a live-streamed 40-minute FindingSchool, effectively promoting the school to international prospects.

LEADERSHIP

Orientation Leader, Warren College, UCSD

April 2025 - October 2025

- Facilitated discussions and presented campus resources to 300+ new students, synthesizing survey data to address concerns and improve programming.
- Managed group dynamics and schedules, adapting communication styles (panels, one-on-one) to ensure effective information transfer and positive user experience.

Events Board Member, Warren College Student Council, UCSD

September 2024 - September 2025

- Collaborated on planning and executing campus events for 500+ attendees, using feedback to iteratively improve engagement.
- Managed an event budget of \$27,581, allocating resources efficiently to maximize impact and adhere to financial constraints.
