EDUCATION

University of California, San Diego

La Jolla, CA

B.S. in Mathematics-Computer Science; Minor in Finance

Expected June 2027

- Relevant Coursework: Design & Analysis of Algorithms, Basic Data Structures, Systems Programming, Software Tools, Design and Analysis of Algorithms(Present)

TECHNICAL SKILLS

Languages: Java, Python, C, C++, JavaScript, HTML/CSS

Frameworks/Libraries: React, Node.js, Express.js, Selenium, Motion.dev

Tools/Platforms: Git, Vim, Postman, Vercel, Auth0, Firebase, Heroku

Databases: MongoDB, PostgreSQL, SQL, AWS

EXPERIENCES

HP Tech Ventures

Remote

Software Engineering Extern (Technical Analyst)

Feb 2026 – Apr 2026

- Optimized technical due diligence pipelines by 40% by developing **Python** automation scripts to scrape and synthesize high-volume market datasets.
- Improved investment screening efficiency by 25% by performing technical architectural audits on startup stacks to evaluate **system scalability** and code robustness.
- Reduced technical risk analysis time by 50% by engineering internal AI-driven research tools using **NLP** to automate the generation of competitive landscape reports.

Theta Tau - Professional Engineering Fraternity

San Diego, CA

Software Project Lead

May 2025 – Present

- Enhanced organizational efficiency for 70+ active members by directing the technical roadmap and feature development of **Garnett**, a production **React/Node.js** web application.
- Streamlined user profile management by architecting **full-stack** solutions integrated with **Firebase** to handle real-time notifications and merit tracking.
- Achieved a 100% project delivery rate for 12 developers by pioneering a technical mentorship framework while overseeing flagship projects **Nutribase** and **LockedIn**.

PROJECTS

LockedIn | React, Node.js, Express, MongoDB, ESP32

October 2025

- Architected a distributed **IoT** system bridging embedded hardware with cloud services for real-time monitoring and automated workflow triggers.
- Engineered modular backend services and **REST APIs** while optimizing database schemas to reduce data retrieval latency by 40%.

Nutribase | MongoDB, Express.js, React, Node.js, C++

May 2025

- Engineered a **MERN-stack** Smart Fridge Tracker that reduced food waste and unauthorized access by 60% through secure user analytics.
- Programmed custom **ESP32** firmware in **C++** to transmit high-frequency real-time weight data to a scalable **Node.js** backend.

Quizki | React, Node.js, Google Gemini API, Auth0, MongoDB

April 2025

- Pioneered a gamified study platform featuring a custom reward system, progress UI, and secure authentication via **Auth0** and **JWT**.
- Integrated the **Google Gemini API** to engineer an intelligent chatbot that delivers personalized study prompts via **Node.js** endpoints.

Geisel Library Study Room Reserver | Python, Selenium, Webdriver

March 2025

- Engineered an automated reservation engine using **Python** and **Selenium** to optimize the UCSD library booking workflow.
- Enabled strategic advance reservations by simulating user interactions with **WebDriver**, increasing total booking efficiency by over 50%.
