EDUCATION

University Of California San Diego

B.S in Mathematics-Computer Science

Sep. 2024 – Jun. 2026, San Diego, CA

De Anza College

Associate in Science for Transfer(AS-T) in Computer Science

Sep. 2022 – Jun. 2024, Cupertino, CA

PROJECTS

Keep In Equilibrium (Survival Game) - UCSD Game Jam (Unity/C#)

- Designed the complete game state and scene management system, controlling all transitions between the main menu, pause screen, and the primary gameplay loop.
- Engineered the core tactical mechanic: a multi-view interface requiring the player to actively cycle through four distinct camera views to locate and neutralize spawned threats via direct input.
- Developed the primary threat system for the main game window, handling the procedural spawning and physics-based movement patterns for all asteroid entities.

Real Time Card Analytic via yolo - End-to-end ML Pipeline

- Engineered a complete data pipeline for model training, capturing gameplay footage via `scrcpy`, annotating a custom dataset with a self-hosted CVAT instance (in Docker), and managing data transfer between local and cloud storage with `rclone`.
- Leveraged cloud GPU resources on Vast.ai for model training, connecting via SSH to configure a Python environment with PyTorch. Proactively optimized training performance by monitoring system resources with `htop` and `nvidia-smi` to determine ideal batch sizes and maximize GPU efficiency.
- Successfully trained and deployed a YOLOv11 object detection model, achieving real-time inference on a live video stream for a proof-of-concept set of game cards.

WORK EXPERIENCE

D-Modular Design – Custom Furniture Specialist

Nov.2021 – Aug.2022, Penang, Malaysia

- Oversaw a team of three to complete custom furniture projects for the hotel.
- Operated CNC routers and drilling machines to enhance workflow.
- Authored manuals for equipment operation and specific measurement templates.

SKILLS, LANGUAGES & INTERESTS

Programming Language: Java, C++, Python, C, Javascript, React

Developer Tools: Git, Unix Shell, SSH, rclone, Docker

ML/Data Science: PyTorch, Pandas, Seaborn, Matplotlib, Scikit-learn, CVAT, YOLOv11

Certifications: AWS Certified Cloud Practitioner

Languages: English; Mandarin Chinese; Malay

Interests: Hiking; DIY Home Project
