EDUCATION

University of California San Diego

Expected March 2028

B.S. in ECE: Computer Engineering

La Jolla, CA

- **Coursework:** Data Structures, Systems Programming, Digital Design, Algorithms, Lower Div Math Sequence
- **Clubs:** IEEE at UCSD, ACM at UCSD, Triton Quantitative Trading, Business Leaders Association

SKILLS

Java, C++, Python, Data Science, Machine Learning, Git, Robotics, Engineering Leadership, Spanish (Intermediate)

EXPERIENCE

Grant Assistant Intern

June 2023 – Aug 2023

Ignited Education

Santa Clara, CA

- Compiled language from over 15 grants into a library to accelerate Ignited's grant writing capacity and speed by over 50%, categorizing distinct sections of a grant, organizing the library document to be easily usable, and training a fellow intern on how to continue the work
- Organized over 300 teacher participant quotes in Excel spreadsheets, categorizing and coding them for future use by the organization for feedback and quality assurance
- Assisted a fellow intern with foundation contacts research, identifying over 50 connections between Ignited's Board of Directors and local foundations

Hardware Lead

Oct 2022 – June 2025

Independence High School Robotics Team

San Jose, CA

- Oversaw projects on designing, prototyping, and implementing devices and apparatus with Lego, Erector Set, sensors, and motors to complete game tasks
- Established, critiqued, and communicated game strategy with a team of over 20 students
- Programmed robot route-taking and action routines in Python
- Served as primary contact between KIPR Botball event organizers, IHS Steam Academy, and team members
- *Botball Best Software Award, Botball Best Engineering Award, 2x Spirit of Botball Award*

Math Tutor + TA

Jan 2024 – June 2025

Independence High School Math Recovery

San Jose, CA

- Provided individualized math tutoring to two students referred by an academic counselor, leading to exam score improvements from the low 60s to the high 80s and 90s.
- Acted as a TA during after-school Math Recovery sessions, taking over when teachers were busy, tutoring from Algebra 1 to AP Calculus and AP Statistics

PROJECTS

COGS 108 Data Science Project | *GeoPandas, Scikit-Learn, Matplotlib, Data Analysis*

Sept 2025 – Present

- Sourced public datasets/APIs containing climate and vegetation data, fire history, and geographic county borders
- Researched prior works on using machine learning for wildfire prediction and climate change effects on fire history
- Classified potential fire danger regions using SVM Classifier and Logistic Regression models

LIVE AI Best Coast 2025: Recei-Bot (3rd Place) | *Computer Vision, Text Analysis, System Design*

Nov 2025

- Composed in-depth EDA regarding image dimensions, blur, brightness, skew, etc and PCA analysis to present and identify both potential strong points and issues within my receipt image dataset
- Preprocessed test images with OpenCV and extracted text strings using Tesseract OCR, then filtered for important information using keywords and delimiters
- Presented database structure, UI design, and other future implementation choices to judges

Top N ETF Momentum Rotation Strategy | *QuantConnect, Python, Research*

Dec 2024 – Feb 2025

- Researched best performing ETFs over the last 5 years across 10 distinct industries
- Implemented trading algorithm using Python and QuantConnect API that finds the N ETFs with the highest momentum, invests in them equally, and liquidates everything else
- **In Progress** Write a paper explaining the strategy, implementation, and performance of the trading algorithm to post on QuantConnect
