SUMMARY

I am a sophomore at UC San Diego currently pursuing a Bachelor's in Bioengineering, specifically with the intention of applying my education to healthcare. I have experience working in lab environments and research involving the effects of colon cancer cells and proteases on the human body.

EDUCATION

University of California: San Diego

Bioengineering

- GPA: 3.89

Expected June 2028

EXPERIENCE

O'Donoghue Lab, San Diego, CA

January/2025

Volunteer Intern

- Worked on research that analyzed the interactions of proteases and their effects on the human body in relation to diseases
- Completed multiple experiments in a lab environment, including gel electrophoresis and protein assays
- Collected data using gel imaging software and plate readers to support research
- Built an extensive lab notebook outlining completed procedures and results

BCN Biosciences, Pasadena, CA

June/2023-July/2023

Volunteer Intern

- Worked to research and develop analogs that targeted colon cancer cells
- Performed multiple experiments in a lab environment, including protein assays and cell cultures
- Collected data using plate readers and microscopes to support research
- Presented findings to the company's founders using Google Slides/Powerpoint
- Learned lab safety and procedures

Sixth Market/Goody's Marketplace, San Diego, CA

December/2024

Part-Time Worker

- Worked as a student employee of UCSD's grocery stores.
 - Restocked shelves with products
 - Served drinks and pastries at the barista station
 - Completed sanitation-related duties
-

SKILLS & ACTIVITIES

- Eagle Scout Rank
 - Boy Scouts of America
- Archdiocesan Christian Service Award
 - Exemplary Commitment to Christian Service
- Maxima Cum Laude Award
 - National Latin Exam
- Editor-in-Chief of The Shield
 - High School Literary Magazine
