

Education

University of California, San Diego - La Jolla, CA

Bachelor of Science in Data Science, Minor in Marine Science

Anticipated Graduation: June 2027

Relevant Coursework:

Halcioğlu Data Science Institute: Principles of Data Science (Python), Programming and Basic Data Structures (Python), Data Structures and Algorithms (Java), Theoretical Foundations of Data Science I–II, Practice and Application of Data Science, Introduction to Data Management (SQL), Introduction to Data Visualization, Applied Statistical Data Analysis and Inference

Scripps Institution of Oceanography: Earth Structure & Environmental Processes, Marine Mammal Biology

Skills

Data & ML: PyTorch, scikit-learn, Pandas, NumPy, Matplotlib, Torchvision, CNNs, Computer Vision, Image Processing, Regression, Classification, Clustering, KNN

Programming: Python, Java, HTML/CSS

Developer Tools: Git, Jupyter Notebook, VS Code

Software: Microsoft Office, Adobe Creative Suite

Projects

CIFAR-10 Image Classification | Python, PyTorch

ACM AI School Project

October 2025

- Built and trained a convolutional neural network (CNN) to classify images from the CIFAR-10 dataset into 10 categories
- Implemented a PyTorch training pipeline including preprocessing, batch training, and evaluation
- Applied data augmentation (random crops, rotations, color jitter) techniques to improve model generalization

Women In Computing @UCSD | HTML, CSS, JavaScript

Project Contributor

September 2025 - December 2025

- Built an informational site covering all eight UCSD colleges, including GE requirements, housing options, and dining halls
- Implemented interactive features using JavaScript
- Collaborated in a small group to design and deploy a functional website

Image & Audio Processing Toolkit | Python, NumPy, PIL

February 2025

- Developed an object-oriented image processing system supporting grayscale conversion, rotation, brightness adjustment, and pixel negation
- Built a multimedia processing module capable of reversing, speeding up, slowing down, clipping, and adding reverb to WAV audio
- Implemented a K-Nearest Neighbors (KNN) image classifier for image classification

Spotify Song Analysis & Recommendation System | Python, Pandas, Matplotlib

November 2024

- Preprocessed and structured song metadata and lyrics using Pandas DataFrames
- Developed a song recommendation tool that identifies Taylor Swift tracks with similar feature values to popular Spotify songs
- Built a lyrics search and word cloud visualization tool to analyze lyrical patterns across songs

Experience

Tzu Chi Academy USA, Oakland Gardens, NY

Teacher's Assistant

September 2022 - January 2024

- Aided in the supervision of children ages 4-5
- Maintained order in the classroom and helped children stabilize their emotions
- Planned and distributed classroom teaching material and activities

Extracurricular Activities

Data Science Student Society (DS3), La Jolla, CA

September 2024 - Current

Member

- Participate in technical workshops focused on Python, SQL, machine learning, and data visualization.
- Engage in hands-on coding sessions covering data cleaning, exploratory data analysis (EDA), and model implementation.

ACM AI @ UC San Diego, La Jolla, CA

September 2025 - December 2025

Participant – AI School

- Completed a structured four-sequence AI School program covering foundations in machine learning, neural networks, and applied AI concepts.
- Implemented machine learning models using Python and common ML libraries

UCSD KADOFF Dance Team, La Jolla, CA

Member

September 2024 - December 2024

- Practiced and performed choreographed dance pieces in team showcases (~12 hours/week commitment)
- Collaborated closely with teammates during rehearsals and performances
