

ISHAAN GOWDA

Bangalore, India

☎ 858-220-8694 ✉ ishaan.gowda1@gmail.com 💻 <https://www.linkedin.com/in/ishaan-gowda-98509b1a0/>

Education

University of California, San Diego

(Mathematics and Computer Science B.S.)

Sep. 2024 – Present

Expected Graduation: Spring 2028

EXPERIENCE

Deloitte

July 2025 – September 2025

AI & Data Science Intern

Bangalore, India

- Developed and applied machine learning models (PCA, Feature Selection, Linear & Logistic Regression, KNN, K-Means, etc.) in Scikit-learn to analyze supervised and unsupervised past datasets and predict probabilities.
- Engineered and fine-tuned LLM, improving retrieval accuracy from 75% to 95% through RAG tuning and prompt optimization.
- Integrated client feedback into model retraining pipelines, aligning performance metrics with business needs and delivering measurable improvements
- Partnered with consultants and data scientists to create testing systems that made experiments faster and easier to compare, cutting iteration time by 30%.

ISHA Cashews

June 2023 – August 2023

Data Analytics & Automation Intern

Bangalore, India

- Deployed IoT sensors to automate the cashew processing line, reducing manual monitoring time by 40% and improving production throughput by 15%.
- Collected and analyzed real-time machine data to detect performance bottlenecks and predict maintenance needs, cutting operating costs by \$360–\$720 per month.
- Developed Python dashboards using Pandas and Matplotlib for live process visualization and anomaly detection, improving data-driven decision-making.
- Collaborated with engineers and operations managers to digitize factory workflows and implement a continuous monitoring system across key production stages.

VIVUM: Finance Team

April 2023 – August 2023

Finance Associate

Bangalore, India

- Assisted with budgeting and expenditure tracking for India's largest inter-school festival, contributing to the highest-ever charitable donation in the event's history.
- Led a fundraising campaign that raised over \$10,000 through targeted corporate partnerships and digital outreach.
- Managed cash flows for 27 stalls, ensuring accurate reconciliation and transparent financial reporting to the school board.

PROJECTS

ASL – Text Converter | *GWH Hackathon*

October 2023

- Led a 6-member team in a 6-hour hackathon to develop an ASL-to-Text translator using Python and OpenCV, displaying live text output through an Android interface built in Android Studio; secured 1st place among 30+ teams.
- Implemented a lightweight CNN to classify static ASL hand gestures from a custom dataset of 500 images, integrating real-time camera input and preprocessing (thresholding, contour detection) to achieve over 85% validation accuracy.
- Streamlined development by organizing task division and prototype testing, completing the working demo under strict time constraints.

Expense Tracker with Data Insights | *Python, Pandas, Matplotlib*

August 2024

- Built an interactive Streamlit web app that logs, categorizes, and visualizes 500+ expense records, helping users identify and track spending patterns.
- Designed data aggregation and cleaning pipelines in Pandas, producing category summaries and monthly comparisons.
- Created Matplotlib dashboards to display spending trends and detect anomalies, and automated CSV and Excel exports for long-term financial tracking, leading to a personal 12% reduction in discretionary expenses.

CORE COMPETENCIES

Programming & Data Tools: Java, Python, Scikit-learn, Pandas, NumPy, Matplotlib, TensorFlow, OpenCV.

AI & Machine Learning: LLMs, RAG Tuning, Prompt Engineering, Regression & Classification.

Finance: Financial Modeling, Budgeting, Fundraising, Cost Analysis, Excel.
