EDUCATION

University of California, San Diego

Master of Science in Computer Science and Engineering

San Diego, CA

Incoming Sept 2026

University of California, San Diego

Bachelor of Science in Data Science & Machine Learning; GPA: 3.81

San Diego, CA

Sept. 2022 – June 2026

- **Relevant Coursework:** Data Structures and Algorithms, Machine Learning, Database Systems, Statistical Analysis, Deep Learning, Computer Organization, Linear Algebra, Probability Theory, Probabilistic Modeling

EXPERIENCE

Data Science Capstone Intern – Intuit

Sept. 2025 – Present

- Researching call-center workforce optimization using time-series forecasting, queueing theory, and ML-based modeling to improve staffing balance, reduce variance, and enhance customer wait-time predictability.
- Designed models using Erlang-C, seasonality decomposition, and shrinkage-adjusted forecasting to estimate service levels, wait times, and staffing requirements under operational constraints.

Data Engineer Intern – San Diego County Sheriff's Office

July 2024 – Present

- Built an end-to-end ETL pipeline extracting from Microsoft SQL Server, transforming via Python, and loading into Azure Table Storage, using PartitionKey/RowKey design to improve query performance and reduce latency.
- Led end-to-end modernization of a legacy subpoena system into a Blazor Server application, cutting processing time from **15 to 3 minutes** and supporting **50,000+** law enforcement users across county, state, and federal agencies.
- Developed Entity Framework Core models and LINQ queries over Microsoft SQL Server, supporting application features such as filtering, joins, sorting, and aggregation, enabling real-time database synchronization.

Data Analyst – Tech4Good Lab, UC Santa Cruz

April 2023 – June 2023

- Conducted comprehensive statistical analysis on **20,000+** survey responses from the 2020 Kaggle Data Science Survey using R, performing data quality control checks to ensure data integrity across 171 countries.
- Identified that Python adoption exceeded **80%** among advanced degree holders while R and SQL showed stronger correlation with higher education levels, providing actionable insights for programming curriculum prioritization.
- Created data visualizations (heatmaps, bar charts, correlation matrices) using Matplotlib, Seaborn, and ggplot2.

Information Technology Intern – City of El Cerrito

June. 2023 – Sept. 2023

- Automated provisioning and deprovisioning pipelines for **250+** users across Active Directory and M365, improving access control enforcement, reducing expired credentials, and strengthening identity security posture.
- Built PowerShell-based endpoint monitoring scripts for logon/logoff activity, enhancing event visibility, supporting security audits, and reducing user-reported issues by **25%** while enabling faster detection of anomalous behavior.

PROJECTS

Fantasy Football Performance Prediction | Python, Scikit-learn, NumPy, Matplotlib

- Forecasted NFL player fantasy points using Support Vector Regression (SVR), achieving improved prediction accuracy by applying PCA for dimensionality reduction to identify distinct player performance tiers.
- Created visualizations to analyze model performance, feature importance, and cluster distributions, enabling data-driven draft and lineup decisions.

Amazon Reviews Analytics | PySpark, AWS EMR, Word2Vec, Machine Learning

- Executed large-scale ETL and feature engineering on Amazon review data using PySpark on AWS, incorporating category extraction, missing value imputation, and Word2Vec title embeddings.
- Built and tuned a Decision Tree regression model to predict product ratings, employing techniques like OneHotEncoding and PCA for categorical features.

TECHNICAL SKILLS

Languages: Python, SQL, C#, R, JavaScript, TypeScript, PowerShell, Bash

Data Engineering: ETL/ELT Pipelines, PySpark, Apache Spark, Hadoop, AWS EMR, Azure Table Storage

Databases: Microsoft SQL Server, PostgreSQL, MongoDB, Azure SQL

Libraries/Frameworks: Pandas, NumPy, Scikit-learn, PyTorch, TensorFlow, React, Node.js, .NET, Entity Framework

Cloud & DevOps: Azure, Azure DevOps, CI/CD Pipelines, Git, GitHub, Docker, Linux
