Skills

- **Programming Languages:** Python, JavaScript, TypeScript, Java
- **Tools & Frameworks:** Figma, Grafana, React, Node, Next, MongoDB
- **Other:** Public Speaking/Presenting, Collaboration

Education

University of California, San Diego

June 2028 La Jolla, CA

Computer Science B.S. – 4.0 GPA

Experience

Dual Path Connected Solutions

 Data Science Consultant

Spring 2025 - Fall 2025 Remote

- Designed **Grafana** dashboards to visualize appliance performance and comfortability metrics when integrated with HVAC and temperature sensors for internet of things applications, projected to boost appliance lifetimes by at least 10 %

Activities & Leadership

Triton Software Engineering

 VP Finance, Developer

Fall 2025 - Present San Diego, CA

- Developed **React** components, REST APIs, and client-side data transformations for client F3 Global, utilizing a **MERN** stack

Jane Street Academy of Math and Programming

 AMPer

Summer 2025 New York City, NY

- Mastered empirically-driven algorithm analysis and implementation, rigorous unit testing, and object-oriented development's best practices through a tailored **Python** course
- Developed a robust quantitative toolkit by collaboratively working through combinatorics and number theory problems

Carnegie Mellon University's Artificial Intelligence Scholars

 Scholar, Tutor

Summer 2024 Pittsburgh, PA

- Unofficially tutored other scholars outside of class to assist in developing their fundamental **Python** skills
- Engaged in an intensive course on general artificial intelligence principles in **Python**
 - Presented a cumulative Alzheimer's Detector project's design process, final product, and use cases to Carnegie Mellon faculty

Projects

ClassSync

 Automated K-12 attendance system and UI

2023 - 2025 Davis, CA

- Architected a full-stack facial recognition (InsightFace) system in **Python** and **React** to automate and secure student attendance and check-out processes targeting K-12 school environments, yielding +99 % accuracy and boosting classroom check-in efficiency up to ≈ 70 %

Honors & Awards

HackPrinceton

 Hacker

Fall 2025 Princeton, NJ

Placed top 5 in Knot API track by creating an automated employee transaction tracker and compliancy checker software in **TypeScript**
