La Jolla, CA, 92093

PROFILE

I am a Molecular and Cellular Biology major at UC San Diego and aspiring scientific researcher. I am interested in investigating the PD1 signalling pathway to understand how the human antitumor response is mediated and how that might affect immunotherapy.

EDUCATION

University of California, San Diego – *September 2025 – Present*

- GPA: 4.00
- Molecular and Cellular Biology
- Relevant Coursework: Introductory Biology Lab, Data Analysis for Biologists in R, Organic Chemistry Part I, Metabolic Biochemistry

Dougherty Valley High School – *August 2021 – June 2025*

- GPA (Weighted): 4.55
- GPA (Unweighted): 3.98
- Relevant Coursework: AP Biology, AP Chemistry, AP Calculus BC, AP Statistics

EXPERIENCE & ACTIVITIES

Undergraduate Researcher in the Hui Lab – *March 2026 – Present*

I am volunteering in the lab of Professor Enfu Hui at UC San Diego, which researches the PD1 signalling pathway in T cells

- I learn and conduct protocols such as molecular cloning, proteomics assays (proximity labelling, western blot, ELISA), and CRISPR-Cas9 editing
- I take detailed notes on protocols, lab meetings, and papers, and keep an organized lab notebook

Undergraduate Researcher in the Farley Lab – *November 2025 – February 2026*

I volunteered in the lab of Professor Emma Farley at UC San Diego, which researches enhancers in the genome and the effects of single nucleotide variants.

- I learned and conducted laboratory standard protocols such as PCR, miniprep, gel electrophoresis and recovery, transforming, cloning, and making reagents

Internship at Avirmax, Inc. – *June 2024 – July 2024*

I interned at Avirmax, Inc., a biopharmaceutical company focusing on viral vector manufacturing for gene therapy.

- I learned and performed PCR, gel electrophoresis and purification, cell culture, DNA extraction, and SDS-PAGE
- Used these techniques for my project to create industry-standard recombinant adeno-associated viral vectors following company protocol

ACHIEVEMENTS

- Spring 2026 Triton Research & Experiential Learning Scholars Recipient
- Relevant AP Exam Scores: Biology (5), Chemistry (5), Calculus BC (5), Statistics (5)
- SAT: 1600 , PSAT: 1520 , National Merit Finalist (2025)
- 2 time British Biology Olympiad Gold Medalist (2023, 2024)

SKILLS

- PCR, Gel Electrophoresis, Cell Culture, Miniprep, Transforming, Ligation, etc.
- Pipetting, Reagent Preparation, Organization/Notetaking, Reading Papers
- R, Python, Geneious
