EDUCATION

UC San Diego

B.S. Data Science, Minors in Cognitive Science (ML), Supply Chain, Math

La Jolla, CA

Sept. 2023 – June 2027

EXPERIENCE

Software Engineer

Chiba Lab

May 2025 – Present

La Jolla, California

- Led development of a data science-powered educational platform using MicroBit microcontrollers to deliver interactive, sensor-driven instruction in K–12 classrooms, enhancing experiential learning through embedded computing and real-time data capture, and contributing to research that is forming the basis of a forthcoming peer-reviewed publication.
- Developed core components of the AI Classroom platform using streaming analytics, sensor data, and intelligent feedback loops to personalize instruction in real time, enabling lessons to dynamically adapt to individual student responses and improving engagement through responsive, data-driven learning experiences.

Project Director

Data Science Student Society @ UC San Diego

Oct. 2024 – Present

La Jolla, CA

- Coordinated 10+ Quarterly data science projects, collaborating with mentors to deliver guided, portfolio-building experiences for UCSD's data science community.
- Executed end-to-end leadership of student project teams, mentoring groups through full project lifecycles to completion, driving strong execution, collaboration, and camaraderie while delivering high-quality, portfolio-ready outcomes.

Operations Lead

AWS Cloud Club @ UC San Diego

November 2025 – Present

La Jolla, CA

- I managed the planning and execution of technical events while overseeing social media and public relations, ensuring strong turnout, clear communication, and consistent brand presence across campus.

Instructional Assistant

UC San Diego Cognitive Science Department

March 2025 – June 2025

La Jolla, CA

- Directed project-based learning for 250+ students in *COGS 9: Introduction to Data Science*, driving team progress, sharpening technical goals, and elevating project quality across the course.

PROJECTS

Geisel Activity Logger | *IoT, ESP32, Arduino, JavaScript, React, Firebase*

- Executed and mentored development of an end-to-end IoT system, guiding a student team while building ESP32 Bluetooth scanners that transform raw environmental signals into anonymized, real-time occupancy data.
- Directed a team in building a live React dashboard connected to Firebase, producing heatmaps, time-series charts, and floor-level metrics and delivering a full prototype, dataset, and technical presentation.

Fire-Ready Forests | *Python, Exploratory Data Analysis, Machine Learning*

- Directed machine learning and data engineering for large-scale ecological tree classification, achieving 89.6% PFT accuracy and 99% R^2 in CBH/CR imputation across 500K+ terrestrial laser scanning (TLS) records.
- Designed and implemented a field-LiDAR data pipeline to improve minority class prediction accuracy within $\pm 10\%$ of true forest distributions for PFT, genus, and species.
- Authored the final research report and led testing analysis, earning 2nd place in SDSC's National Data Platform Challenge.

TECHNICAL SKILLS

Languages: Java, Python, C, C++, SQL (Postgres), JavaScript, HTML/CSS, R, MATLAB

Libraries & Frameworks: React.js, D3.js, pandas, numpy, matplotlib, sklearn, seaborn, pytorch, BERT, Tailwind

Tools: APIs, Git, GitHub, VS Code, IntelliJ, Jupyter Notebooks, Excel, Tableau, LaTeX, PowerPoint

Topics: LLMs, (Un)Supervised Learning, Data Structures, Full-Stack Development, Project Management, Supply Chain Management, Statistics, Text Analysis, Deep Learning, Data Visualization, Agile Development

Soft Skills: Organization, Presentations, Detail-Oriented, Communication, Quick-Learner
