EDUCATION

B.Sc. in Computer Science & Statistics (Honours), National University of Singapore (NUS)

Independent CS Research Module Advancing Music Synthesis & Generation Through AI

Activities: NUS Hack & Roll, SMU Datathon, QuantChallenge 2025

PROFESSIONAL EXPERIENCE

Axal | Software Engineering Intern

Jan 2026 – Dec 2026

Streamlined High-yield on Digital Assets

LightHouse | Data Engineering Intern

Sep 2025 – Oct 2025

Automated Hedge Fund Quantitative Strategies for Investments

- Migrated market data pipelines from Polygon to Databento, enhancing data reliability and accessibility for quantitative strategy backtesting
- Integrated OpenFIGI and SECDefs APIs to standardize instrument identifiers, improving data consistency across datasets.

Millipede | Data Engineering Intern

May 2025 – Aug 2025

SaaS Startup for Real Estate Development

- Researched, designed, and implemented scalable image retrieval and processing pipelines for high-volume datasets; experimented with multiple solutions to ensure optimal performance, significantly reducing latency and improving reliability
- Designed and deployed client-facing dashboards using BI tools (Looker), integrated with automated data validation & cleaning, alert systems & real-time analytics
- Developed modular ETL workflows and implemented CI/CD pipelines to enable continuous deployment & efficient data ingestion across sources

Perfingo | Product Analytics & Strategy Intern

Feb 2025 – July 2025

AI-driven FinTech startup helping young adults build smarter financial habits

- Analysed user traffic data to translate user behaviour patterns into product feature improvement
- Conducted market research & competitive benchmarking to refine product positioning & support strategy roadmap
- Co-developed new financial analytics modules, and visualization capabilities on the client-facing dashboard
- Built investor-facing pitch decks, translating product insights and market trends into strategic narratives

Marymount Labs | AI Product Engineering Intern

Jan 2024 – June 2024

HealthTech startup building AI-powered products to streamline clinic development

- Researched and designed a scientifically grounded Large Language Model (LLM) architecture tailored for real-time user feedback, integrating a Retrieval-Augmented Generation (RAG) pipeline with safety guardrails
- Evaluated and optimized model performance (e.g., accuracy, latency), contributing to improved decision tools
- Conducted customer and industry research to inform go-to-market strategies and product roadmap prioritization
- Co-authored a peer-reviewed paper presented at the Asia Pacific Population Health Conference (2024), showcasing novel applications of LLMs in healthcare workflow automation

RESEARCH & PROJECTS

Alternative Data Market Signal Discovery

Aug 2025

Designing & building an analytical pipeline integrating ETF/stock price data, macroeconomic trends, and alternative data sources to flag out potential early signals of market and sector movements

Asian Institute of Digital Finance | Assistant Researcher

Feb 2025 – May 2025

Conducted research on federated learning & privacy-preserving machine learning techniques to enable secure multi-party financial data collaboration

NOTABLE HONOURS & AWARDS

Asian Business Plan Competition – Top 8

2025

Jane Street Hong Kong Women in STEM (WiSE) Program	2024
Regional Young Entrepreneurship Case Challenge – Finalist & Top	2024
HealthHacks (Education Category) – Champion	2024
Global Youth Entrepreneurship Challenge (GYEC) -- Finalist & National Top 3	2022

VOLUNTEERING

Founder & Executive Director, InTech Org Dec

2021 – Feb 2024

- Youth-led non-profit that aims to promote tech education & literacy amongst youths; registered & featured on media
- Pioneered INterSTECH – SG's 1st Tech Intersection 2-Day conference; Engaged more than 20 speakers, 100 participants from more than 20 different schools
- Established collaboration & partnership with more than 7 international & SG-based organisations (i.e Infocomm Media Digital Authority Code@SG); Expanded the Organising Team from 4 members to close to 40 members from 5 different schools
- Invited as a speaker by IMDA at their Tech Leadership Workshop; attended by more than 200 secondary school students

SKILLS

Technical skills: Programming Languages (Python, SQL, Javascript, Java, R), Libraries/Frameworks (OpenCV, Pandas, Numpy, PyTorch), Git

Non-technical skills: Project/Product Management (Agile & Scrum), Business Strategy, Market Research, Leadership, External Relations & Outreach
