SUMMARY

Designer who ships code. Cognitive Science (Design & Interaction) graduate combining end-to-end product design with front-end development in React and TypeScript. Specializing in interaction design, design systems, and information architecture. Proven ability to lead from user research through high-fidelity prototyping to production-ready components. Bilingual in English and Korean.

EXPERIENCE

Lead Web Designer & Facilitator | *Brilliance Exposed, DFA UCSD* Jan 2026 – Present

Website for international photographic exhibition honoring Black professionals in STEAM (Charles Wright Museum, Tiffany & Co.)

- Conducted competitive audit of 10 exhibition websites across two categories, synthesizing findings into an evidence-based design direction adopted by the team
- Architected a 7-section information structure grounded in 3 user personas, mapping each section to specific user needs to ensure content hierarchy matched audience intent
- Established brand guidelines (typography, color palette, layout) adopted by a 7-person design team; serve as sole client liaison and only member with both UX design and front-end development capability

Product Designer | *Switchless (IoT Startup)* Oct 2024 – Jun 2025

Smart home automation hardware and software startup

- Led end-to-end product design of a smart home command center, unifying 5 siloed sensor types into one cohesive mobile experience through iterative wireframing, prototyping, and usability testing
- Applied cognitive science principles to map data flow between physical sensors and mobile interface, aligning technical constraints with user mental models to reduce onboarding friction
- Designed an Automation Builder transforming multi-variable conditional logic into a guided step-by-step wizard, reducing cognitive load for non-technical users
- Built a reusable component library and design token system in Figma, ensuring cross-platform consistency and accelerating designer-developer handoff

Marketing Manager & Creative Director | *DVC, UCSD* Nov 2024 – Present

UCSD's largest electronic music organization — Deejays & Vinylphiles Club

- Led brand strategy and visual identity, growing Instagram to 3,700+ followers through cohesive visual storytelling and campaign design
- Designed event branding that drove a sold-out 500-person venue takeover and generated 129,000+ views on the flagship campaign

PROJECTS

Drift — Apple Watch & iPhone — ADHD time perception | joonwoopark.me FigBuild 2026

- Led UX design of a chronoception-tracking tool mapping biometric signals to three temporal states (Flow, Neutral, Drag); designed restraint-based interaction model (no real-time display, no gamification, evening reflection only) for Figma for Education competition judged by designers from Meta, Google Labs, YouTube, Spotify, and Microsoft

joonlovesmusic — React, TypeScript, Supabase, Spotify API | joonlovesmusic.vercel.app 2025

- Designed and developed a full-stack music rating web app with Spotify API integration, 0-100 rating system, and editorial collections page — end-to-end from concept to deployment

Trash Rush — Mobile game for PlanetFlip (non-profit) | joonwoopark.me 2025

- Illustrated game environments and designed narrative-driven UX flows with NPC dialogue; achieved 90% aesthetic approval and 15% improvement in sorting accuracy among student testers

EDUCATION

University of California, San Diego June 2026

Bachelor of Science (B.S.) in Cognitive Science, Design and Interaction

SKILLS

Design: Figma, FigJam, Figma Make, Adobe Photoshop, Adobe Illustrator, Framer, Midjourney

Development: HTML, CSS, JavaScript, TypeScript, React, Tailwind CSS, shadcn/ui, Supabase, Vercel, Node.js

Process: User Research, Usability Testing, Competitive Analysis, Persona Development, Information Architecture, Wireframing, Prototyping, Design Systems, Interaction Design

Other Tools: Cursor, Claude Code, Final Cut Pro, Notion, Google Stitch, Illustration
