EDUCATION

University of California, Irvine - Expected Graduation: June 2026 - Computer Science (B.S.) - GPA: 3.75

Mt. Sac Community College - June 2024 - Mathematics and Sociology (A.S-T) - 3.6 GPA and Dean's Honor List

Certificates: CIS Professional in Object-Oriented Design & Programming, Artificial Intelligence in Business

TECHNICAL SKILLS

Relevant Coursework: Object-Oriented Design, Data Structures, Data Management, Statistics

Programming Languages: Python, C++, HTML, CSS, JavaScript, SQL, Java

Frameworks, Libraries, & Tools: Numpy, Pandas, Skicit-learn, NLTK, SpaCy, React, Seaborn, Figma, Next.js

PROJECTS

Agonus

November 2025 - February 2026

- Led frontend architecture planning and implementation for an AI trading tournament platform using Next.js and React, defining user flows for live tournaments, agent profiles, and betting interactions.
- Designed and built core UI components including live leaderboards, agent feeds, and wallet-based betting interfaces, integrating on-chain data via Wagmi.
- Collaborated with backend and blockchain teams to translate system architecture into frontend requirements, API contracts, and real-time update flows.

HelloHealth - Design Project

March 2025 - June 2025

- Improved healthcare accessibility for non-native English speakers by designing an interactive Figma prototype with translation, glossary, and document-scanning features.
- Increased clarity of symptom reporting workflows as measured by reduced task completion errors in prototype testing, by developing a guided "pre-appointment symptom helper" informed by survey and persona research.
- Validated design concept as measured by approval from peers and instructors, by presenting competitive analysis, user research insights, and high-fidelity mockups.

Offbeat - IrvineHacks

January 2025

- Created a real-time multiplayer dancing game where players identify an impostor, as measured by smooth, lag-free rounds in hackathon testing, by developing a Node.js backend with Socket.IO for live lobby management, synchronized timers, and voting.
- Improved player engagement, as measured by seamless interaction between host and up to 10 players, by building a responsive Next.js front-end with real-time player lists, countdowns, and voting UI.
- Collaborated with 3 teammates to deliver a fully functional prototype in 36 hours.

PROFESSIONAL EXPERIENCE

Illumi Academy

August 2023 – Current | Teacher Assistant | Walnut, CA

- Supported over 15 students in mastering math concepts by providing one-on-one and group tutoring sessions, resulting in improved academic performance and confidence.
- Collaborated with 2–3 teachers to identify learning gaps and implemented tailored strategies that enhanced student engagement and understanding.
- Supervised 30+ students and reinforced positive behavior to maintain a productive learning environment through consistent monitoring and feedback.
