EDUCATION

University of California San Diego

La Jolla, CA

Bachelor of Science in Computer Science (GPA: 3.58)

Sep. 2024 – June 2027

Relevant Coursework: Accelerated Java Programming, Data Structures and Object-Oriented Design, C Programming, Discrete Mathematics, Assembly and Processor Design, Algorithm Analysis and Design

Silicon Valley Career Technical Education Trade School

San Jose, CA

Mobile App Design and Computer Coding

Aug. 2023 – June 2024

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, C, C++, Swift, HTML/CSS, Assembly

Software: Git, Figma, Visual Studio Code, IntelliJ, Xcode, Terminal, Google Suite

Frameworks/Libraries: MERN (MongoDB, Express, React, Node.js), Firebase

EXPERIENCE

Triton Software Engineering

December 2025 – Present

Developer

La Jolla, CA

- Developed **7 reusable React components** (interactive operation cards, navigation buttons, and dropdown UI) from **Figma** designs for a full-stack **MERN** platform supporting housing assistance applications
- Built **RESTful APIs** with **Node.js** and **Express** integrating **Firebase** and **MongoDB** to manage applicant data for a platform expected to support **thousands of users**
- Contributed **2,200+ lines of code** to a **20k+ line** production codebase while collaborating with an **8-developer** team using **Git**-based version control and code reviews

Google SWE Fellowship

March 2026 – Present

G-SWEP Fellow (Code2Career x Basta)

- Selected through a competitive **CodeSignal** assessment for a **10-week** Google-backed software engineering fellowship with **Basta Code2Career**
- Solve **10+ LeetCode problems per week** in **Java** and **Python** while receiving weekly **1:1 mentorship** from a Google Software Engineer focused on data structures, algorithms, and technical interview preparation

SkillsUSA Web Design and Development Region 1 Competition

February 2024

Frontend Developer

San Jose, CA

- Won **1st place** in the 2024 Region 1 Competition by developing a client-facing website for the Dinuba Chamber of Commerce Fall Festival
- Added interactive elements, including a countdown timer and navigation logic, using **JavaScript**
- Implemented a responsive navigation bar and multi-page site structure using **HTML** and **CSS**

PROJECTS

Nutribase | MERN, C++, ESP32, Arduino, IoT, HX711 | UCSD Theta Tau

June 2025

- Programmed **ESP32** firmware enabling real-time fridge weight tracking ($\pm 2\text{g}$ accuracy) using the **HX711** load cell amplifier
- Designed an IoT data pipeline transmitting sensor data to a **Node.js** backend every **10 seconds** and storing structured inventory data in **MongoDB**
- Built a **React** dashboard with **WebSocket** updates for real-time food inventory monitoring
- Led coordination across a **12-member engineering team**, assigning development roles and tracking project milestones

Global Education Website | JavaScript, HTML, CSS | UCSD Women In Computing

December 2025

- Integrated a geographic **API** with asynchronous **JavaScript** to dynamically render data for **15 countries** in an interactive learning interface
- Implemented client-side logic managing **10-question quizzes**, answer validation, and results display
- Designed responsive and accessible layouts using **HTML** and **CSS** while collaborating on a small development team

iOS Social Media App | Swift

April 2024

- Built an iOS social networking app in **Swift** featuring a persistent navigation bar supporting multiple views
- Implemented profile management with username/photo updates and follower/following tracking
- Tracked post likes and interactions using custom data structures and Swift state management
