SUMMARY

Undergraduate Computer Science student with strong foundations in programming, web development, and problem solving. Experienced in peer education, technical leadership, and explaining complex concepts through workshops, panels, and educational outreach. Passionate about supporting students' learning, building confidence in technical skills, and fostering inclusive learning environments.

EDUCATION

University of California, San Diego (UCSD)
Bachelor of Science in Computer Science

San Diego, CA
Expected December 2026

TECHNICAL SKILLS & LANGUAGES

Programming Languages: C++, C#, JavaScript, Python, C, ARM Assembly, HTML/CSS, SQL
Tools & Engines: Unreal Engine, Godot, Unity, GitHub, React, Docker, IoT (ESP32), Canva, Figma
Languages: Native English Speaker

WORK EXPERIENCE

Gameplay Programmer — Lyterian Games – “Seeing Red”
2025–Present

Remote / San Diego, CA — Jun

- Implement gameplay features and system logic using Unreal Engine Blueprints and C++.
- Created Level Blueprints for quest triggers, UI pop-ups, audio cues, and interaction flows.
- Built and optimized Level of Detail (LOD) meshes to improve performance and reduce rendering load.
- Collaborate with designers, artists, and engineers to refine gameplay and user experience.
- Contribute to gameplay prototypes and internal design discussions.

EXPERIENCE

Co-Founder, Engineer, Feature & Web Developer — BLEprint

San Diego, CA — April 2025

- Participating in UCSD Blackstone Launchpad
- Interviewed construction workers to identify product requirements and UX needs.
- Developed interactive features using React and refined UI components based on feedback.
- Collaborated with teammates across design and engineering.

Team Leader & Front-End Developer — Card Collector Website
<https://cse110-sp25-group07.github.io/card-collector/>

San Diego, CA — Mar 2025

- Led development of an interactive card-collecting web application.
- Designed UI components, layout flows, and responsive visual elements.
- Managed GitHub Issues and assisted teammates with technical questions.

Gameplay Programmer & Designer — “Hang-Man: The Game”
<https://beworkley.itch.io/hang-man-the-game>

San Diego, CA — Apr 2025

- Developed a comedic platformer in C# using Godot during a two-week sprint.
- Implemented animations, audio systems, and core gameplay logic.

- Awarded “Best Funniest Game” twice at the VGDC Showcase.

Engineer — Weatherdrobe

San Diego, CA — Mar 2025

<https://dennis.ece140.site/>

- Built a responsive website using Python, JavaScript, SQL, and Docker.
- Designed UX flows for an AI-driven outfit recommendation feature.

LEADERSHIP & INVOLVEMENT

Vice President of Programming — ColorStack UCSD

San Diego, CA — Present

- Host technical workshops and weekly LeetCode prep sessions for 50+ students.
- Lead programming initiatives supporting underrepresented students.
- Organize mentorship events and collaborative design/coding sessions.

Software Developer & Education Fellow — AI Student Collective (AISC) *San Diego, CA — Present*

- Help maintain and update the club website, improving accessibility and usability.
- Support curriculum planning and educational programming for beginner-friendly AI events.
- Assist with outreach efforts to introduce high school students in San Diego to foundational AI concepts.

Programmer — UCSD Diamond Hackathon — “Community Access Hub”

San Diego, CA — Apr 2025

2025

https://devpost.com/software/community-access-hub?ref_content=my-projects-tabref_feature=my_projects

- Developed a prototype in 36 hours using JavaScript, HTML/CSS, and JSON.
- Worked on UI flow, feature implementation, and rapid iteration.
