EDUCATION

University of California San Diego

La Jolla, CA

Bachelor of Science in Computer Engineering

August 2023 – May 2027

Relevant Coursework: Data Structures and OO Design, Advanced Data Structures and Algorithms, Circuits and Systems, Object Oriented Programming

EXPERIENCE

UC San Diego - Jacobs School of Engineering

July 2025 – Present

Full Stack Developer

La Jolla, CA

- Developed a full-stack web platform using **React (Javascript)** and **ASP.NET (C#)** for the lab's Parallel GDS program, improving user efficiency; saving **6 hours** of work time by providing a real time rendering platform for nanoscale devices
- Built a real-time **3D visualization engine** with **WebGL2**, achieving **60+ FPS** performance for complex scientific models and nanoscale metadvice layouts through efficient rendering and camera control.
- Streamlined the development workflow by implementing a **CI/CD pipeline** with **GitHub Actions**, automating testing and deployment to cut release cycles from days to hours.

Association for Computing Machinery - ACM

January 2024 – May 2024

Software Lead

La Jolla, CA

- Lead a team to build and launch the mobile game "Who Dunnit?" onto the App store using **React Native (Javascript)**, accomplishing cross-platform gameplay and reliable performance.
- Integrated backend systems with **Node.js** and **Firebase** to automate in-game events, countdown timers, and push notifications, maintaining **100% multiplayer uptime** and consistent real-time synchronization during testing.
- Implemented real-time gameplay using the **Expo Location API**, creating GPS-based challenges that boosted player engagement by **20%** during testing.

Code Ninjas

May 2023 – August 2024

Programming Teacher

Roseville, CA

- Instructed over **500+** students foundational and advanced concepts in **JavaScript**, **C++**, and **AI/Game Development**, improving coding proficiency and engagement based on post-course assessments.
- Created lesson content on coding best practices, debugging techniques, and **scrum methodologies** to enhance teamwork and promote sustainable learning outcomes.
- Coached students on identifying bugs, creating test strategies, and debugging autonomously, resulting in more consistent project completion and a notable rise in code quality.

PROJECTS

EOT Mobile News App | *React Native, JavaScript, Axios, WordPress API, Expo*

May 2023 – June 2023

- Built a full-featured mobile news application with **6+ interactive screens** using **React Native (JavaScript)** and React Navigation's bottom tab navigator, reducing navigation load times by **30%**.
- Fetched and rendered live article content via the **WordPress REST API**, displaying real-time headlines, images, and descriptions with refresh intervals under **2 seconds**.

Advent Calendar Web App | *React.js, JavaScript, CSS3*

January 2026 - February 2026

- Designed and developed a fully responsive single-page web application using **React.js** with modular component architecture, implementing dynamic state management to control content unlocking across multiple calendar days.
- Implemented real-time progress tracking with dynamic progress bar calculations and responsive layout adjustments, enhancing UX consistency across screen sizes.

TECHNICAL SKILLS

Languages: Java, Python, C, C++, JavaScript, C#

Frontend: React, React Native, HTML, CSS, WebGL2

Backend: Node.js, ASP.NET, Flask, REST APIs

Tools & Platforms: Git, GitHub Actions, Firebase, Expo, Arduino IDE

Libraries: Axios, Pandas, NumPy, Matplotlib
