

LINGYI SU

+1 (925) 352-0897 ◊ Milpitas, CA ◊ lingyisu01@gmail.com

EDUCATION

Bachelor of Science in Mathematics-Computer Science

University of California, San Diego (UCSD)

2025–Expected 2029

Current GPA: 4.00

Relevant Coursework: Accelerated Intro to Java, Systems Programming and Software Tools, Data Science and Practices, Linear Algebra, Calculus and Analytic Geometry

High School Diploma, Milpitas High School

2021-2025

Weighted GPA: 4.60

Unweighted GPA: 3.80

Relevant Coursework: AP Computer Science A, AP Calculus BC, AP Physics 1 & 2, AP Statistics

SKILLS

Languages: Java, Python, C, HTML, CSS

Libraries & Frameworks: Pandas, Seaborn, Matplotlib, TensorFlow

Tools & Environments: Git, GitHub, Jupyter Notebook

Soft Skills: Communication, time management, problem solving, willingness to learn

PROJECTS

Image Classifier for Cat and Dog Breeds — UCSD SPIS Program, Summer 2025

- Designed and trained a convolutional neural network using TensorFlow to classify 37 cat and dog breeds, achieving 88% classification accuracy
- Preprocessed and augmented image datasets with 7k+ images using NumPy and Pandas to improve model generalization
- Evaluated model performance using accuracy metrics and visualized results with Matplotlib
- Presented technical findings and model limitations to peers and instructors

Spotify Music Valence Analysis — UCSD COGS 108 Group Project, Fall 2025

- Analyzed 114k Spotify tracks and 1.8k DEAM tracks to study relationships between audio features (tempo, key, loudness, and speechiness) and emotional valence
- Performed data wrangling to handle missing values, inconsistent formats, and feature selection using Pandas
- Assisted with data visualization using Matplotlib to support exploratory analysis of relationships between audio features and song valence
- Co-authored a technical report detailing methodology, results, and limitations

OTHER INFORMATION

- Fluent in English and Mandarin
- Interests: Piano, Badminton, Gaming
