Experience

100K Trees For Humanity Student Coordinator

Alameda, CA
February 2022 – August 2024

Led and organized student outreach initiatives fostering strong community engagement and increasing program participation. Coordinated logistics for mulching events in collaboration with the local Recreation & Parks department, ensuring organized operations and timely completion. Managed communication between the company, government agencies, and students, ensuring clear, accurate, and actionable information was exchanged. Facilitated the successful mulching of 33 tons of organic material, contributing to urban sustainability efforts in the city of Alameda.

Alameda Unified School District Encinal High School Tutor

Alameda, CA
October 2023– June 2025

Monitored progress and assessed student performance through feedback and review sessions. Collaborated with teachers and parents to ensure alignment with school curriculum and support academic goals. Designed customized learning plans tailored to individual student needs, focusing on developing specific skills in their subject area.

Leadership & Activities

Key Club Service Projects Coordinator (Division)

Bay Area, CA
April 2024 – March 2025

Managed project logistics, including scheduling, coordinating roles during events, and maintaining clear communication with team members and partner organizations to ensure smooth operations. Collaborated with organizational leaders and external partners to ensure seamless execution of events and operations, ensuring resource efficiency. Monitored and evaluated project outcomes, ensuring goals were achieved and feedback was collected for future improvements.

Deca International Competitor

Alameda, CA
September 2022 – June 2025

Achieved 1st Place Overall in Marketing Communications Series at California State DECA competition (SCDC) 2025. Competed in International Level (ICDC) 2025. Leveraged in depth marketing analysis, branding, and market information to develop and present presentations. Demonstrated communication and analytical skills adapting quickly to new challenges and delivering persuasive solutions.

HackTheHood Build: Data Science Program

Alameda, CA
June 2024 – August 2024

Applied Python skills to solve data science problems, including data collection, analysis, and visualization. Collaborated with peers and mentors, gaining exposure to various tools and frameworks in the data science field

Skills

Technical: Python, Java, SQL, C (Beginner), React JS

Languages: English, Chinese
