Experience

CCPorted (Founder, August 2024-February 2026)

- Scaled website to 100K recurring MAU at peak.
- Reduced costs by 99.7%.
- Built distribution platform for >400 video games.
- Designed and released proprietary game titles ('CCPorted Originals') accumulating 90K+ plays.
- Scaled CI/CD pipelines to deploy across >30 domains and 10 servers over hundreds of regions.

Lawnly (Mobile App Development Intern, October 2025-February 2026)

- Serving as primary Android developer.
- Built >30 new pages and optimized current builds.
- Integrated, improved, and created RESTful routes.

Education

University of California, San Diego (Double B.S. Computer Science and Mathematics, expected graduation June 2029)

- Staff member for the largest technical community on campus (ACM).
- Mentoring a team of first-time developers through building a project to completion.
- Teacher at ACM-Hosted web development bootcamp.

International Baccalaureate (2023-25)

- Completed papers in machine learning and quantum computing.
- California Association of IB World Schools Student of the Year.

Projects

Forge Game Engine

- Built for CCPorted, to quickly move games from idea to production.
- Games are created using a node-tree architecture to quickly add functionality to components.
- Able to support >2K active colliders within a scene at 60 FPS.

MultiSnake

- Multiplayer snake game with 4K MAU at peak.
- Implemented and optimized WebSocket architecture to handle real-time state synchronization for concurrent players across 5 game modes and 50 lobbies.

Aidebase

- Built comprehensive CRM for nonprofits handling full donor lifecycle, from lead tracking to donor conversion and campaign analytics.
- Integrated Stripe payments for seamless donation processing, complete with automatic receipt generation.
- Implemented team collaboration tools with role-based access control.

AdHoc

- Engineered intelligent ad exchange leveraging AWS Rekognition and NLP-based keyword extraction.
- Designed custom reinforcement learning model to dynamically optimize ad placement and improve CTR over time.
