PROFILE

Results-oriented policy & planning undergraduate at UC San Diego focused on climate-resilient infrastructure and the energy transition. Combines GIS, R, policy analysis, and environmental domain knowledge to produce decision-ready deliverables (briefs, memos, StoryMaps) that inform planning and implementation.

EDUCATION

Bachelor of Science in Political Science Data Analytics

June 2026

Minor in Urban Studies and Planning

GPA: 3.88

University of California, San Diego

Relevant Coursework: Policy Analysis - POLI 160AA, Text-as-Data - POLI176, USP191A-B Advanced GIS Series, POLI 179A Applied AI

Certificate in Data Analysis & Visualization

SKILLS/

ArcGIS Suite (Pro, Online, StoryMaps), QGIS, R (data analysis & visualization), Microsoft Excel, Google Workspace, Qualtrics, Canva, Policy brief and Report writing

EXPERIENCE

Blue-Green Infrastructure Research Intern - Center on Global Justice

Sep 2025 - Present

San Diego, CA

- Contribute to the development of a **city-level white paper** on blue infrastructure strategies, directly informing San Diego's long-term policy response to 2024 flood vulnerabilities.
- Conducting research and policy analysis under the mentorship of UCSD faculty and government professionals, integrating environmental science and urban planning approaches to **sustainable infrastructure**.
- Develop an independent research component on flood resilience and equity, including scoping and implementation constraints.
- Engaging youth stakeholders through **environmental education and policy advocacy** initiatives, fostering early involvement in climate resilience and urban sustainability efforts.

Resident Assistant - UCSD Residential Retail & Supply Chain Services

Aug 2025- Present

San Diego, CA

- **Manage operational support** and communications for a transfer resident community (**60+ students**); triage issues and connect residents to campus resources.
- Maintain documentation and on-call response protocols; support conflict resolution and safety compliance.
- **Plan and facilitate weekly programs** promoting community involvement and personal growth

Research Scholar - Bioregional Center

Mar 2025- July 2025

San Diego, CA

- Awarded a **1000\$** scholarship to lead a **policy research project** on environmental governance in the San Diego-Tijuana bioregion; analyzed cross-border policy dynamics shaping climate resilience.
- Produced a research policy paper framework, published **3+ articles on Substack**, and designed a zine translating complex policy issues into community-accessible media

Energy & Waste Intern - Student Sustainability Collective

Oct 2024- July 2025

San Diego, CA

- Supported sustainability program delivery and reporting for energy/waste initiatives; coordinated partners and documented outcomes.
- Executed **campaigns reaching 500+ students** and supported delivery of UCSD's Earth Day Festival (**1,500+ attendees**).
- Advanced **composting and waste-diversion initiatives** through operational coordination

Selected Projects

EU Energy Transition Discourse (Text-as-Data) | R (tidyverse, ggplot2, quanteda)

- Built a mixed-methods text analysis pipeline (hand coding, gold labels, Naive Bayes + LLM labeling) to quantify pro-renewables framing over time in European Union energy-transition discourse.
- Delivered reproducible analysis outputs (cleaned corpus, labeling workflow, summary visuals) to support comparative interpretation and reporting.

Imperial Beach Flooding & Infrastructure Resilience Analysis | GIS + policy synthesis (tools: ArcGIS Pro)

- Analyzed flooding exposure and infrastructure vulnerabilities in Imperial Beach using spatial layers and policy context; identified priority risk areas and implementation constraints.
- Produced decision-ready deliverables (map outputs + concise write-up) translating analysis into planning-relevant recommendations.
