

Milo Lin

La Jolla, CA

(650) 448-8846 | mb1002@ucsd.edu | [linkedin.com/in/milobylin](https://www.linkedin.com/in/milobylin)

SKILLS

- Python
- Collaboration
- Data Analysis
- C++
- Java
- Web App Development
- Communication
- Detail-Oriented
- Pandas
- R
- React
- HTML

EDUCATION

University of California San Diego

Expected: June 2029

B.S. Biology w/Spec Bioinformatics, Computer Science Minor, Pre-Med | 4.0 GPA | Provost Honors

Relevant coursework: Introductory Biology Lab, Data Analysis/Design for Biology, Accelerated Introduction to Programming, Calculus-Based Probability & Statistics

CERTIFICATIONS

edX Verified Certificate for CS50's Introduction to Cybersecurity, edX

October 2024

edX Verified Certificate for Introduction to Data Science with Python, edX

July 2024

PROJECTS

"The Bap1 Mutant's Effect on The Histone Variant H2Az", Ferguson Lab, UC San Diego Health

October 2025-present

- Implemented and optimized genomics and epigenomics pipelines for CUT&RUN data analysis.
- Contributed insights during team meetings to refine research methodologies and synthesize findings.
- Applied R packages, including DiffBind and ggplot, to generate research figures that visually represent data analysis results.

EXPERIENCE

Tech Team, MVHacks 8.0, Mountain View High School

November 2024-April 2025

- Designed and developed graphical components for MVHacks 8.0 main website using React and Material-UI to improve user interface.
- Applied HTML, CSS, and JavaScript skills in developing MVHacks 8.0 main website, contributing to overall functionality and design.
- Collaborated with team members to troubleshoot and resolve technical issues.

Summer Research Assistant, Wang Lab, Stanford School of Medicine

July-November 2023

- Developed Python scripts to analyze topologically associated domains using Hi-ChIP analysis.
- Utilized Python data analysis libraries such as Pandas, Seaborn, and NumPy to enhance script efficiency.
- Conducted literature reviews to support ongoing research projects.

Software Developer, FRC Team 971: Spartan Robotics, Mountain View High School

August 2021-June 2023

- Developed scouting web application using HTML, CSS, Go, and other programming languages to gather competition match data
- Wrote code for robot superstructure in C++ to improve performance and reliability
- Implemented version control using Git and Gerrit for source code management.
- Created custom scripts for Foxglove to streamline camera log analysis
