

# Moyinoluwa Ogunjobi

(771) 233-0390 | [amoyinogunjobi@gmail.com](mailto:amoyinogunjobi@gmail.com) | [linkedin.com/in/moyinoluwaogunjobi/](https://www.linkedin.com/in/moyinoluwaogunjobi/)

## EDUCATION

### Howard University

*Bachelor of Science in Computer Science*

Washington, DC

*Expected May 2029*

GPA: 4.0/4.0

- Awards/Scholarships: Howard University Presidential Scholarship
- Relevant Coursework: Computer Science I (C++), Intro to Computer Science (Python), Calculus III, Differential Equations, Linear Algebra, Discrete Structures, Probability and Statistics
- Extracurriculars: ColorStack, National Society of Black Engineers (NSBE), Society of Women Engineers (SWE)

### The International School, Ibadan

*Cambridge Advanced Level Diploma*

Ibadan, Nigeria

*Feb 2023 – Nov. 2023*

- Awards: British Council Outstanding Cambridge Learner Awards - First Place in Nigeria Across Three A Levels

## TECHNICAL SKILLS

**Languages:** Python, C++, SQL, JavaScript, HTML/CSS

**Libraries:** pandas, NumPy, Matplotlib, Seaborn, scikit-learn

**Frameworks:** Tensorflow, PyTorch, Flask

**Tools & Software:** Microsoft Excel, Power BI, Google Colab

## EXPERIENCE

### Marketing & Data Science Intern

*Rooted by Tree Technologies*

February 2026 - Present

*Washington, DC*

- Lead social media content creation and campus engagement efforts, designing graphics for Rooted's Instagram page and coordinating outreach campaigns including Howard University student election initiatives to grow brand visibility
- Analyze user data from a 500+ user base to generate actionable insights for the software team, identifying usage patterns and trends to inform product decisions and improve user experience

### Math Tutor

*Howard University Middle School of Math and Science*

February 2026 - Present

*Washington, DC*

- Provide 2 hours of weekly one-on-one math tutoring to a middle school student, developing personalized lesson plans and practice problems to reinforce classroom concepts and strengthen foundational skills
- Track student progress across assignments and assessments to identify knowledge gaps and adapt instruction accordingly, building long-term problem-solving confidence

### Data Scientist

*Women Techsters Fellowship*

October 2023 - December 2024

*Remote*

- Completed intensive data science training in **probability & statistics**, Python programming, machine learning algorithms (**regression, classification, KNN**), deep learning (**CNN**), and model deployment with **Flask**
- Developed machine learning predictive model using **Python (scikit-learn, pandas, numpy)** to forecast customer food choices with **82% accuracy**, enabling personalized recommendations for a food delivery app serving a potential user base of **1000+** customers
- Conducted market research for the food delivery app by designing surveys, analyzing **500+** responses using **Excel** and **Power BI visualizations**, and authoring a detailed research report that informed the product design feature prioritization

## PROJECTS

### Mastercard Data Challenge | *Python, scikit-learn, pandas, Matplotlib*

March 2026

- Analyzed public health and economic datasets (CDC BRFSS PLACES, ACS, HUD, USDA, SBA) across 46 neighborhoods in Washington, DC using Python (pandas, NumPy, Matplotlib, scikit-learn) to investigate why residents in the city's most underserved communities face significantly worse healthcare access despite living in one of America's wealthiest cities
- Built Lasso regression and decision tree models on census-tract-level data to identify small-business activity — specifically commercial diversity and loan access — as statistically significant predictors of food insecurity
- Proposed a data-driven intervention framework of micro-clinics, affordable food retailers, and telehealth hubs targeted at neighborhoods where 96% of tracts qualify for federal small-business incentives, with trackable success metrics tied to the same indicators used in the analysis

### Outfit Finder | *PyTorch, OpenCLIP, FAISS, FastAPI, RapidAPI, Chrome Extension*

February 2026

- Built end-to-end image-to-product search system using **OpenCLIP** embeddings and **FAISS** vector indexing to perform similarity search across 2,390+ fashion products
- Engineered **REST API** with **FastAPI** to return top-k ranked results in real time, enabling sub-second semantic retrieval from high-dimensional embedding space
- Developed Chrome extension for region-based image capture, allowing users to crop any on-screen fashion item and instantly retrieve visually similar products
