

EDUCATION:

University of California San Diego

Expected May 2028

Bachelor of Science - Bioengineering : Biosystems (Junior Standing)

SKILLS: Fusion 360 • SOLIDWORKS • Python • MATLAB • Microsoft Excel • Arduino • User research

RELEVANT EXPERIENCE:

Physics 1AL (Mechanics Laboratory) - Reader

Jan 2026 - Ongoing

- Assisting course instructors by grading homework, exams, and papers, ensuring consistent evaluation.

UCSD Envision Maker Space - Trainee

April 2025 - August 2025

- Guided students in the safe and effective use of 3D printers, CNC machines, laser cutters, and vinyl cutters, ensuring adherence to proper procedures.
- Documented machine usage protocols and troubleshooting steps.

PROJECTS:

SE 1 - Design Build Project

June 2025

- Prototyped a windmill (0.2V output) and built a balsa wood tower supporting 27 lbs.
- Collected and analyzed performance data using **Excel** to optimize design efficiency.
- Won 1st place overall among eight teams.

HealthLink - Life Sciences Hackathon

Oct 2025

- Developed a wearable device using **Arduino Nano** with an alarm system to support patients with Alzheimer's, improving caregiver-patient communication.
- Built and tested functional prototype within 36 hours.
- Presented the solution, business model and overview of the product to judges.

BMES Member - Prosthetic Arm Project

Sept 2025 - Ongoing

- Contributing to the design and development of a prosthetic arm using **Fusion 360**, prototyping, and **Arduino**.

Engineering World Health - Product and UX lead

Oct 2025 - Ongoing

- Leading **product definition and discovery** for a gamified mobile app aimed at reducing digital overstimulation.
- Conducting user research and market research to refine product requirements.
