J.S. Held LLC

Director of Infrastructure Operations / August 2021 – July 2024

Accountable for a global Infrastructure team that delivered reliable and high-performing infrastructure systems. Built and led a multi-national Infrastructure team responsible for IT infrastructure and M&A integration. Supported over 100 offices in 15 countries. Developed department budget and co-developed the current cloud-first strategy used by the entire IT department.

- Responsible for developing a complete infrastructure team, including hiring all global team members.
- Identified risks and developed actionable plans to protect the business.
- Partnered with the cybersecurity team to ensure the IT landscape was secure and compliant.
- Managed infrastructure integration projects of over 30 acquired companies.

- Developed and executed a project to migrate PBX & VOIP systems to MS Teams and outfit over 100 video conference rooms.
- Managed all infrastructure vendor relations and negotiated vendor contracts.

Infrastructure Manager / March 2020 – August 2021

- Oversaw Operations and Cloud Engineering teams.
- Responsible for infrastructure and cloud security.
- Aligned teams to comply with ITIL framework.
- Managed and facilitated all recruiting, hiring, and training for the infrastructure team.
- Managed all performance incentives and held semi-annual performance reviews.
- Created and managed initiatives to migrate all physical servers to Azure.
- Communicated the company's technology strategies to management, staff, vendors, and stakeholders.
- Managed a project to migrate over 900TB of data to cloud-based storage.
- Ensured all productivity software, such as Office 365, was monitored and centrally managed for security, stability, and overall governance, in compliance with relevant regulations.
- Responsible for Disaster Recovery Planning and Testing.

Technical Project Manager / November 2019 – March 2020

- Planned and executed network standardizations in over 100 offices.
- Planned and executed the migration of over 100 legacy PBX phone systems to Microsoft Teams Voice to support global calling during the pandemic, saving over \$900k per year in expenses.

Contractor / June 2019 – November 2019

- Integrated technology from newly acquired companies.

Hagen, Streiff, Newton & Oshiro Forensic Accounting

Director of Information Technology / November 2011 – May 2019

Accountable for IT operations in a global forensic accounting firm, reporting to the CIO. Focusing on hiring, training, and leading a team of technical specialists to support and equip staff with technology.

- Partnered with the executive planning committee to design new IT initiatives and forecast the budget.
- Authored operational & security policies, procedures, standards, guidelines, and best practices for compliance with vendor agreements.
- Responsible for securing the organization's technology and ensuring it met all compliance standards.
- Assessed new innovative technologies, mission-critical systems, security, and communications.
- Responsible for operational and project budgets.
- Responsible for IT purchasing.
- Designed and maintained business continuity/disaster recovery plans.
- Developed and maintained key relationships with outside vendors and consultants.

- Migrated email and phones to Office 365 & Skype for Business voice cloud platforms, saving over 67%.
- Enhanced productivity and collaboration by designing and deploying Skype for Business, including full VoIP and conferencing capabilities.
- Improved efficiency, reliability, and reduced costs by establishing a standardized network infrastructure with WAN optimization and cloud hosting.
- Reduced IT capital expenses 60% by virtualizing most data center servers.
- Unified domain from several standalone domains, workgroups, and acquired companies.
- Managed seamless data center relocation of all systems, network infrastructure, and telecom.
