Education

University of California San Diego

- **Major:** Bachelor of Science in Artificial Intelligence **Expected Graduation:** June 2029 **GPA:** 3.914
- **Coursework:** CSE 11 (Accelerated Intro to Programming), CSE 29 (Systems Programming and Software Tools), CSE 12 (Basic Data Structures and Object-Oriented Design), CSE 25 (Introduction to AI)

Fremont High School

- **Cumulative GPA:** Unweighted: 3.85
 - **Activities/Clubs:** Badminton team, Science Olympiad, Investment club, National Honor Society
-

Experience

Triton Trading Group | Head of Internal Affairs

December 2025 - Present

- Manage internal operations for a 30-member quantitative finance organization, coordinating weekly initiatives and aligning execution with executive board strategy.
- Designed and deployed a full-stack task management platform using HTML, CSS, and JavaScript, integrated with Google Firebase for real-time data synchronization across board members.
- Develop weekly meeting slide decks to communicate technical concepts, project updates, and strategic direction.

Spartan Advisory Partners | Technology/Web Development Intern

July 2024 - July 2025

- Designed and maintained the company website, improving layout and overall user experience
- Managed and organized LinkedIn connections by tagging contacts to streamline client outreach
- Combined technical problem-solving with business insight to support both website functionality and client engagement

Fremont High School | AP Computer Science Teaching Assistant

August 2023 - June 2024

- Assisted over 30 students in understanding core Java programming concepts, including object-oriented design, recursion, and data structures
 - Supported the teacher by helping students with assignments, bug fixes, and questions
-

Projects

Emotion Recognition CNN | Python, TensorFlow

February 2026

- Designed and implemented a custom convolutional neural network (CNN) for facial emotion classification (48x48 grayscale images), achieving ~65% validation accuracy.
- Developed command-line inference script for end-to-end prediction workflow.
- Built a modular preprocessing and training pipeline with data augmentation, stratified validation split, and caching for reproducible experimentation.

Color Reduction Filter | Java

March 2023

- Developed an image processing algorithm that reduced image color complexity using the K-Nearest Neighbors (KNN) algorithm
 - Classified pixels based on color proximity in RGB space to generate simplified images based on user request on amount of colors with minimal visual loss
-

Skills

- **Technical:** Java, Python, TensorFlow, OpenCV, Basic Neural Networks, Convolutional Neural Networks, Web Development, UI Design, Audio Mixing, Sound Engineering, Digital Audio Workstations
- **Professional:** Rapidly Adaptable, Effective cross-functional collaborator, Self-motivated, Reliable, Analytical and Creative Problem Solving, Critical Thinking and Decision Making
