Education

University of California San Diego

Bachelor of Science in Data Analytics, Minor in Computational Social Science

Expected Graduation June 2026

GPA: 3.94

Coursework: Applied Data Analysis, Machine Learning, AI & Technology Strategy, Applied Market Research, Predictive Algorithms

Experience

Axos Bank

San Diego, CA

Product Management Intern, Platform

October 2025 - January 2026

- Built 5+ Tableau and Power BI dashboards by joining HRIS and Workday datasets (2K+ candidate and employee records), defining metric logic and segmentations to produce 10+ workforce performance insights used to inform HRIS product decisions
- Evaluated product workflows and partnered with 3 cross-functional HRIS stakeholders to develop 5+ product requirements, identifying 5 key feature opportunities designed to enhance user adoption and drive engagement across the product ecosystem
- Led UAT and QA validation for an enterprise platform integration by querying 5+ source tables, reconciling downstream reports, identifying 10+ platform defects, resolving 3 post-deployment data inconsistencies, and ensuring end-to-end reporting integrity

Chime

San Francisco, CA

Product Management Intern, Identity, Trust, & Safety

May 2025 - August 2025

- Modeled 100K+ event-level records in Looker to build 3 dashboards identifying 10+ post-deactivation contact drivers; mapped upstream journeys and product triggers to isolate 5 friction areas; and partnered with 5+ teams to define an execution roadmap
- Analyzed 15K+ deactivation cases and 40+ tickets to identify 5+ friction points in the user separation journey; defined product requirements and a 4-layer resolution model with IVR guardrails and smart routing deflecting 20% of escalation-prone contacts
- Conducted 30+ QA reviews and shadow sessions to identify agent pain points in SOPs and member journey flows; implemented 3 modular scripting enhancements, increasing messaging consistency to 90% and reducing escalations by 40% during UAT

Visa

San Francisco, CA

Product Strategy Intern, Acceptance & Issuing Solutions

June 2025 - August 2025

- Benchmarked 500+ competitor and internal capabilities, identifying 10+ functional gaps to guide product strategy and 3P partnerships; built cross-functional framework integrating market research to prioritize 5+ GTM areas across product portfolio
- Designed dynamic Power BI dashboard analyzing \$200M+ in revenue, churn, and product usage data to identify 5+ high-risk client segments and 5+ product dependencies, informing product strategy, roadmap decisions, and client attrition mitigation
- Synthesized insights from 10+ stakeholder interviews and 3 data sources to define product capability prioritization criteria and evaluate 3P vs. in-house feasibility, aligning 4 teams and accelerating 5+ roadmap pivots, 2 GTM launches, and time-to-market

KPMG

Los Angeles, CA

Federal Technology Consulting Intern

June 2024 - August 2024

- Produced 2 use case proposals, integrating 10+ insights from stakeholder engagement; facilitated 5+ internal discussions and feedback sessions with Subject Matter Experts, incorporating 30+ pieces of feedback to enhance relevance and feasibility
- Examined 5+ policy and program applications, identifying and assessing 20+ data sources to support use case analysis; proposed Tableau dashboards to visualize health equity disparities, contributing to 4 actionable insights aligned with strategic priorities

Projects

CRE: Contract Review Engine

- Designed a Contract Review Engine applying user-centered design principles, translating NLP outputs into contract scores and feedback; executed 3+ design iterations and processed 100+ NDAs, prioritizing usability for law students and small firms
- Iterated through 20+ model refinements, defining performance metrics including 85% accuracy, 82% precision, and 78% recall to guide roadmap decisions; validated interpretability with 5-fold cross-validation, aligning outcomes with adoption needs
- Developed a modular review pipeline scalable from NDAs to 5+ additional contract types, including service and employment agreements; outlined MVP scope and roadmap tailored to two user groups: academic learners and small legal teams

Leadership & Activities

University of California San Diego

La Jolla, CA

Head Teaching Assistant, Computational Thinking

September 2025 - Present

- Instructing weekly interactive coding workshops on topics such as conditional logic and abstraction, raising lab scores by 10%
- Curating 10+ interactive labs, accelerating troubleshooting, and strengthening applied computational social science exercises
- Mentoring 50+ students in weekly office hours and tutorial sessions, earning an average teaching evaluation score of 4.9/5

Triton Business Society

La Jolla, CA

President

January 2023 – Present

- Directing operations for a 50+ member organization, supporting 20+ chapter events, initiatives, and strategic priorities
- Representing the chapter in 3 external partnerships, collaborating with campus organizations and professional networks
- Mentoring 8 junior officers and committee leads, fostering leadership development and organizational succession planning

Skills & Interests

Technical: Python, Tableau, SQL, Power BI, Looker, Jira, LucidCharts, Asana, Trello, FigJam/Figma, Zendesk, Microsoft 365, Slack

Language: Fluent in English, Speaking skills in Chinese

Interests: Vinyl Record Collection, Boulderling, Mentorship Volunteering, Basketball, Cooking, Tennis, Bowling, LinkedIn Games
