EDUCATION

University of California, San Diego

Bachelor of Science in Electrical Engineering (Controls and ML)

La Jolla, CA

Expected 2027

EXPERIENCE

Triton Robotics

Electronics Engineer

October 2025 – Present

La Jolla, CA

- Responsible for design and validation of custom signals in **EasyEDA**.
- Validated board through extensive use of simulation and physical testing.
- Used **C++** to develop control algorithms for robot motion and turret rotation.

Triton Unmanned Arial Systems

Emmbeded Systems Engineer

September 2025 – Present

La Jolla, CA

- Responsible for design and validation of custom signals PCBs in **Altium**. Designed tests in **C** to validate sensors
- Validated board signal integrity through use of oscilloscopes and function generators.
- Collaborated with a multidisciplinary team to integrate electronic systems into UAV.
- Additionally responsible for designing guided payload electronics and control systems.

Fremont Robotics Academy

Founder and President

June 2021 – Present

Fremont, CA

- Established a youth-run non-profit to provide STEM education in the Bay Area through robotics
- Hosted FIRST Lego League tournaments, and robotics classes, impacting over **100 students** across **10** schools
- Led **100+** volunteers across 2 countries and 10 annual events over **10000+** man-hours since founding
- Developed community outreach campaigns to secure 15k in funding through grants and donations

Rocketry Team Member - Fundraising and Design

Ohlone College

Sep. 2024 – June 2025

Fremont, CA

- Developed fundraising campaigns to raise 10K for materials and competition fees.
- Used Fusion 360 to design prototype rocket for initial proposals
- Organized sponsorship outreach and on-campus events

FTC Team 18340

Captain

Jan 2022– July 2024

Fremont, CA

- Designed custom PCBs in **KiCAD** to reduce time testing and validation of software by **30 percent**
- Prepared technical deliverables each season to ensure completion of key requirements by multiple subteams
- Managed a 10-member team with a 10K annual budget
- Utilized a top-down design philosophy in **OnShape** to rapidly iterate and minimize integration issues.

PROJECTS

MiniTransPac | Python, OnShape, KiCad, 3D Printing, Soldering

June 2024 – Present

- Developed a custom sailing ROV to cross the Pacific Ocean
- Utilized **Python** to design custom algorithm for localization and sailing movement/navigation
- Fully custom hull and sail wing designed in OnShape

AWARDS

Deans List | First Tech Challenge

April 2023

- Recognized as one of 200 finalists (from 85,000 students) across the world at FIRST Championship for leadership and technical expertise
- led a robotics team, mentored multiple elementary LEGO robotics teams, and taught coding and robotics to 400+ kids.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript, HTML/CSS, R

Frameworks: React, Node.js, Flask, WordPress

Simulation Software: SolidWorks, MATLAB

CAD and 3D Modeling: Fusion 360, OnShape, Solidworks, KiCad, Altium
