

RAKSHAN PATNAIK

Fremont, CA | (510) 516 6158 | rakshan.patnaik@gmail.com

EDUCATION

University of California, San Diego

Bachelor of Science in Data Science | Minor in Business Analytics | Provost Honors

San Diego, CA

Sep 2023 - Mar 2027

- Coursework: Data Structures and Algorithms, Statistical Analysis, Mathematical Theory of Machine Learning, Data Visualization, Data Management, Business Analytics, Scalable Data Systems, Deep Learning, Representation Learning

PROFESSIONAL EXPERIENCE

Halcioğlu Data Science Institute

Research Scholar, Garden31

San Diego, CA

Sep 2025 – Present

- Build an interactive GIS map that aggregates food-access data into a shared, reusable platform for San Diego organizations.
- Design a Supabase SQL database with API- and Zapier-integrated tables for harvest and distribution operations in real time.

Axos Bank

Marketing Analytics Intern, MarTech Automation

San Diego, CA

Jun 2025 – Sep 2025

- Audit and updated 20+ weeks of Abandoned Apps and Onboarding dashboards by cross-checking QA files, recalculating funding metrics, validating KPIs, and recommending improvements, heightening conversion accuracy by ~\$2 million.
- Built 2 predictive models in Python (Logistic Regression, XGBoost) to forecast and improve application submission.

Economics Research Lab, UC San Diego

Research Assistant

San Diego, CA

Jan 2025 – Jun 2025

- Assisted PhD candidate Ida Grigoryeva in developing a database pipeline to track real-time violent events in Rio de Janeiro.
- Designed a web scraping pipeline with Python, BeautifulSoup4, and Selenium, extracting ~900 articles over the past decade.
- Extracted article metadata to categorize violence type and mapped incidents onto a heat map using Python and GeoPy.

LEADERSHIP EXPERIENCE

Data Science Student Society UCSD

Board Member, Professional Events Team

San Diego, CA

Oct 2024 – Present

- Coordinate events like panel discussions, workshops, and networking sessions, offering students valuable industry exposure.

Product Management Club UCSD

Data Product Manager, Binary Labs

San Diego, CA

Jan 2025 – Jul 2025

- Leading a team of designers, data analysts, and marketers to optimize Dexteria 2, a therapy game app, for stroke rehab.
- Analyzing app usage data and conducting user interviews with physical therapists to identify underutilized features and user pain points, enabling data-driven recommendations to improve app's features and usability for the stroke survivor market.

UNIVERSITY PROJECTS

Shakespearean Small Language Model

Jan 2025 – Jun 2025

- Developed a Shakespearean sentence completion model using LSTM and TensorFlow Keras, training on compiled text.
- Preprocessed Shakespearean text by cleaning, tokenizing, and vectorizing data, ensuring compatibility with framework.
- Led model experimentation efforts, refining preprocessing scripts and optimizing sentence parameters to enhance accuracy.

National Power Outage Duration Predictor

Mar 2025

- Conducted comprehensive data cleaning and preprocessing on U.S. power outage records (2000-2016), for suitable analysis.
- Performed EDA to uncover correlations between geographic, infrastructural, and economic factors and outage duration time.
- Built a multiclass classification model using a Random Forest Classifier to predict power outage severity (Short, Moderate, Long, Severe), leveraging an sklearn pipeline to streamline preprocessing and training, enhancing predictive accuracy.

Song Recommendation System

Oct 2023

- Developed a Python-based song recommendation system based on the quantified similarity to a Taylor Swift song input.
- Implemented a search tool to input a term and find the total occurrences and number of Taylor Swift songs it appears in.

SKILLS

Technical Skills: Python (Pandas, NumPy, TensorFlow, Keras, sklearn), Java, SQL, HTML, Javascript (D3.js)

Tools: Tableau, PowerBI, Microsoft Office (Word, PowerPoint, Excel), Salesforce, Azure DevOps, Jira, Datorama/MCI, AWS

Awards: Eagle Scout (awarded March 2023), AWS Certified Cloud Practitioner (awarded September 2024)
