

Rishil Chintalapati

858-603-5200 | rchintalapati@ucsd.edu | <https://www.linkedin.com/in/rishil> | github.com/RishilC1

EDUCATION

University of California, San Diego

San Diego, CA

B.S. Data Science | GPA: 3.81

Expected June 2028

- **Relevant Coursework:** Basic Data Structures and Object-Oriented Design, Theoretical Foundations of Data Science I, Theoretical Foundations of Data Science II, Practice and Application of Data Science, Linear Algebra, Econometrics A, Data Mining, Data Management

RELEVANT EXPERIENCE

DS3 Project Developer

Jan 2026 – Mar 2026

FirmScape - Data Science Society | Placed 3rd out of 10 projects

San Diego, CA

- Analyzed correlation between industry concentration and firm growth and housing prices across U.S. cities with 50 years of data using multi-source data (275k+ metro-quarter observations) from Kaggle, Zillow, FHFA
- Engineered lagged economic features and implemented Ridge, Random Forest, and XGBoost regression models, achieving 0.27 out-of-sample R^2
- Extended the framework with Logistic classification to identify breakout housing markets (0.81 AUC, 0.70 F1) and deployed results in an interactive Streamlit dashboard; presented findings to HDSI faculty and industry judges

PROJECTS

Customer Churn Predictor | *React (Vite + TS), FastAPI, SQL, sklearn*

Oct 2025 – Present

- Trained Random Forest classifier (300 estimators, 80/20 split) achieving ROC-AUC ≈ 0.9 on 440k-row customer churn dataset with scikit-learn
- Engineered feature pipeline with tenure, contract type, support tickets, monthly spend, and login recency for binary classification
- Built containerized three-tier system (React UI, Express API, FastAPI ML service) with JWT auth for CSV batch inference and real-time predictions

Multimedia Processing App | *Python, Streamlit, NumPy, OOP, KNN, DSP*

Aug 2025 – Present

- Built an interactive Python/Streamlit application enabling real-time image and audio manipulation across multimodal data inputs
- Implemented 6+ image operations (brightness adjustment, pixelation, edge detection, rotation, negation, grayscale) and 5 audio transforms (reverse, speed/slow, reverb, clipping) with efficient signal processing
- Designed reusable OOP class hierarchies and integrated a KNN-based image classifier, achieving ROC AUC = 1.00 on a daytime vs. nighttime dataset using a 20% holdout split (small training set)

BrokerBot — LLM-Powered Negotiation Agent | *Next.js, Node.js/Express, SQL, Twilio*

Oct 2025

- Built LLM-powered broker agent with custom Claude wrapper for autonomous contractor price negotiation at SDx Hackathon
- Scraped and structured contractor contact data using SerpAPI, Cheerio, and Axios, persisting results in PostgreSQL
- Automated SMS negotiation flows via Twilio for iterative quote collection and comparison through fully scripted pipeline

TECHNICAL SKILLS

Languages: Python, Java, SQL, HTML/CSS, JavaScript, TypeScript

Tools/Technologies: React, Node.js, Express, Vite, Streamlit, PostgreSQL, JWT, Git/GitHub, CORS, FastAPI, sklearn, pandas, Docker, SerpAPI, NumPy

Concepts: Machine Learning, Object-Oriented Programming, Data Structures, Algorithms, Authentication, Containerization, Debugging
