

Roberto Echeverria

(323) 809-5834 | recheverriasosa@ucsd.edu | www.linkedin.com/in/robertoecheverriasosa

EDUCATION

University of California, San Diego | Cumulative GPA 3.94

La Jolla, CA

Bachelor of Science: Data Science | Machine Learning Track

June 2027

Relevant Coursework: Data Structures & Algorithms (Java), Applied Python, Foundations of Data Science

EXPERIENCE

Waymo Career Institute | *Software Engineer Intern* | Los Angeles, CA

August 2024 - December 2024

- Conceived and designed an ultrasonic navigation system enabling safe maneuvering through low-visibility sandstorms, and a solar-powered thermal regulation system to stabilize sensor performance under extreme temperatures
- Created a virtual network of clients, servers, and a firewall security for 50 GB of cloud storage using VirtualBox
- Developed a helpdesk website using GoDaddy AI Website Builder to manage ticketed requests

Hack the Hood | *Data Science Researcher* | Oakland, CA

June 2024 - August 2024

- Keynote Speaker presenting Mergers and Acquisitions Data Science project findings on 14,000 data points
- Utilized data visualization techniques to communicate findings to a group of 200+ people effectively
- Used MIT App Inventor to create a functioning food vendor app that connects street vendors to clients

TechKnowHow | *Coding Instructor* | Oakland, CA

May 2023 - August 2023

- Instructed 200+ students in tech-focused summer camps, fostering a passion for computer science
- Adapted curriculum in LEGO, Robotics, Scratch, and Java to diverse skill levels
- Translated complex tech concepts into understandable terms, promoting creative problem-solving

UCSD Data Science Student Society (DS3) | *Software Developer* | La Jolla, CA

Sept 2025 - Present

- Utilized best coding practices to write clean code and create front-end user interfaces for the DS3, NETS website
- Leveraged agile methodologies in weekly sprints to optimize production time

PROJECTS

Fantasy Football Draft App | *ML & SWE Project* | San Francisco, CA

Aug 2025 – Sept 2025

- Processed 16,000+ rows of NFL data covering 3 seasons, 300+ players, and 16+ weekly performance features via automated NFL data API pipelines
- Developed a custom Fantasy Point Projection system using Gradient Boosting Regressor, achieving MAE = 0.52
- Built a full-stack draft interface with interactive player stats and highlight video playback for each drafted player

CodePath | *Intermediate Technical Interview Prep Student* | Berkeley, CA

February 2025 - April 2025

- Completed weekly coding challenges and mock interviews in Python and Java
- Practiced LeetCode-style problems (e.g., two pointers, BFS, DFS, recursion) through pair programming

Azure Databricks ETL Pipeline | *Data Engineering* | San Diego, CA

March 2026

- Designed and built an end-to-end ETL pipeline on Azure Databricks processing 1M+ bank account fraud records using PySpark and Delta Lake on ADLS Gen2
- Implemented medallion architecture (Bronze → Silver → Gold) with schema enforcement, null handling, and data quality flagging to structure raw transaction data for downstream fraud analysis
- Wrote PySpark transformation notebooks performing data validation, type casting, and partitioned writes, reducing raw data volume by ~X% through deduplication and quality filtering

LEADERSHIP & PERSONAL DEVELOPMENT

Cal Habitat for Humanity | *Officer* | Berkeley, CA

January 2025 - June 2025

- Built homes, advocated for the unhoused, and brought awareness to the Bay Area housing crisis (290+ hours)
- Managed a \$2.5K budget for a week-long service trip, coordinating logistics for 15 students to restore 0.13 acres of land by placing 2 tons of soil and planting native species in Santa Cruz, CA

SKILLS AND INTERESTS

Languages: Bilingual in English and Spanish

Programming Languages: R, Java, Python, CSS/HTML, JavaScript,

Libraries: Pandas, Matplotlib, Seaborn, WordCloud, Geopandas, NumPy, React, Power BI, Tableau
