PROJECTS

TritonVibe — AI-Powered Campus Event Discovery App

- Identified a need in UCSD event discovery through user experience and peer insights
- Designed and built an AI-powered event platform using Lovable.dev to centralize on- and off-campus events
- Built personalized recommendations based on user interests and social preferences
- Designed UI/UX to reduce discovery friction and improve engagement
- Developed the system as a scalable solution for campus community-building

Market Research & Product Strategy — i4X Consulting

- Designed and conducted primary market research (survey + analysis) on diaspora communities
- Used research insights to support the development of a new financial service concept and market entry strategy
- Developed evaluation frameworks for retail partners based on trust, accessibility, and operational capacity
- Turned insights into actionable input for business model development and implementation

Experience Design & Event Production — International Student Fellowship

- Designed and executed a large-scale cultural event for 60+ attendees across a diverse community of students and local members
- Led end-to-end planning across scripting, rehearsals, performers, and event logistics
- Planned and prepared a multi-course dining experience, connecting content design with on-the-ground execution

EXPERIENCE

Israel Defense Forces (IDF) — International Cooperation Division

2020–2022

Non-Commissioned Officer

- Led operations in high-pressure environments, managing real-time security coordination along the Israeli-Jordanian border
- Was promoted and transitioned into diplomatic engagement with foreign military attachés and international stakeholders
- Participated in joint military exercises with allied forces, strengthening operational and tactical coordination

- Was selected to participate in strategy discussions with senior leadership (Colonel-level), contributing to operational decision-making
- Completed advanced NCO training; implemented leadership frameworks to coordinate team operations

Innovating for X (i4X) — Student Consultant (UCSD Basement) 2025–Present

- Partnered with corporate stakeholders (PriceSmart) to evaluate and design new financial service models
- Applied business model frameworks (MMC/BMC) to structure ambiguous market opportunities
- Delivered iterative strategy updates based on research, testing, and stakeholder feedback
- Completed UCSD Extended Studies course Essentials of Entrepreneurship, Innovation, and Design to support venture strategy development

Jewish Student Union (JSU) — Vice President & Marketing Lead 2024–2025

- Developed marketing strategy and visual content, increasing Instagram engagement by 666% through consistent, community-focused posts
- Restructured programs into interactive, experience-driven events, increasing engagement by 140% and strengthening member connection and participation

TAMID Group at UC San Diego — Finance Track Member 2025–Present

- Conducted market research and financial analysis for Israeli startups within a case-based investment framework
- Built valuation models to evaluate growth opportunities in early-stage companies
