EDUCATION

University of California, San Diego

Expected Jun. 2026

B.S. in Computer Science

GPA: 3.69/4.0

- **Relevant Coursework:** Software Engineering, Operating Systems, Cloud Computing, Machine Learning

TECHNICAL SKILLS

Languages: Python, C/C++, C#, Java, Javascript, Typescript, Go, SQL

Frameworks/Libraries: React, Next.js, React Native, Node.js, FastAPI, Flask, Apache, TailwindCSS

Databases: PostgreSQL, MongoDB, Convex, Supabase

Tools: AWS, GCP, Docker, Kubernetes, Linux, Git, GitHub Actions, Bash, Jest, Postman, Jira

EXPERIENCE

Software Developer

La Jolla, CA

UCSD Basic Needs Center / CSE Society

Oct. 2025 - Present

- Built and maintained full-stack features using React Native, Node.js, and Supabase to enable **100+** users track budgets, analyze spending patterns, and access personalized financial guidance
- Architected a PostgreSQL-based financial data system with automated expense recalculation and goal tracking, decreasing manual data entry for users by **90%**

Software Engineer Intern

San Diego, CA

Data Science Alliance

Sept. 2025 - Dec. 2025

- Developed a new full-stack feedback platform using Next.js, TypeScript, and MongoDB, reducing feedback response time by **70%** and enabling transition from in-person to remote playtesting
- Fixed **100+** UI bugs using C#, Jira, and Git, reducing the UI bug backlog by **50%** and improving reliability across user-facing features
- Designed frontend prototypes for an early-stage web application using Figma and Next.js to demonstrate core features to stakeholders and guide product direction

Software Engineer Intern

Remote

The Great Game LLC

Aug. 2025 - Nov. 2025

- Built a Python-based graph routing algorithm with OpenAI API to translate path graphs into step-by-step textual directions, improving navigation clarity by **30%**
- Developed a Python CLI developer tool that converts geographic data into walkable routes in CSV format, generating datasets for **3,000+** locations

PROJECTS

Hexsmith | NextJS, TypeScript, Convex, Anthropic SDK, Inngest

March 2026

- Built a full-stack AI code editor using Next.js, TypeScript, and Convex with real-time data sync, supporting multi-file project management through a chat interface
- Architected a streaming Anthropic SDK agent loop with **8** file system tools (read, write, create, delete, rename, scrape) and Inngest background jobs to handle long-running LLM tasks without request timeouts

Eventory | ReactJS, FastAPI, Python, Mongo, Gemini API

May 2025

DiamondHacks 2025 @ UCSD

- Developed an AI-powered event tracker using NLP to extract deadlines from messaging platforms (Discord and Slack) with **99%** accuracy, enhancing how users discover and manage time-sensitive events

AI Chess Engine | C/C++, Bash

Dec. 2024

Developers' Guild @ De Anza College

- Built an AI chess engine with Minimax and Alpha-Beta pruning, simulating **2,000** moves/second and improving performance **50%** through pruning
