EDUCATION

University of California, San Diego

B.S. in Probability and Statistics

La Jolla, CA

Sept 2025 – June 2029

- Relevant Coursework: DSC 20, DSC 10, Math 20C, Math 20B; GPA: 3.96/4.0

EXPERIENCE

UCSD Data Science Student Society (DS3)

Oct 2025 – Present

Full Stack Engineer

La Jolla, CA

- Build and maintain the DS3 club website for 1000+ members using React, Tailwind CSS, and Supabase.
- Develop websites and conference pages for partner UCSD clubs, handling UI design, responsive layout, and deployment.
- Lead client meetings to gather requirements and deliver sites aligned with each club's design and goals.

High Temp Metals

Jun 2025 – Sept 2025

Intern

Glendale, CA

- Assembled and configured custom computer systems, performing hardware diagnostics and component-level troubleshooting for client orders.
- Supported daily operations, including inventory management and logistics coordination under the mentorship of VP John Vulchev.

SPHS Veritas Tutoring

Sept 2023 – Jun 2025

Head Tutor

South Pasadena, CA

- Tutored 8+ peers daily in computer science, math, writing, and history, contributing to an average grade improvement of 15% across students.
- Managed scheduling and hours for a team of tutors, ensuring consistent coverage and quality of sessions.

PROJECTS

SEN Conference Website | *Next.js, TypeScript, Stripe integration*

- Developed the official Student Entrepreneurship Network (SEN) conference website at UC San Diego.
- Built key features, including conference information, landing page, and ticketing via Stripe integration.
- Implemented the site using Next.js and TypeScript, styled with Tailwind CSS.

PantryPal | *React, PyTorch, FastAPI*

- Built a full-stack recipe recommender with a React/TypeScript frontend and FastAPI/Python backend, deployed on Vercel and HuggingFace Spaces.
- Fine-tuned a CLIP ViT-B-32 model on ~1,500 images across 46 classes via two-phase training with differential learning rates and mixup augmentation, achieving ~94% test accuracy.
- Awarded Best Presentation at DS3's Dinocage, selected by industry professionals and faculty.

Restaurant Industry Analytics | *Python, Pandas, HTML*

- Built an ETL pipeline to ingest, clean, and merge 4 restaurant datasets (400+ records) from Restaurant Business Online and Yelp, enabling cross-dataset analysis across chains, independents, and city-level data.
- Engineered a 5-tier growth classification system by converting string-encoded YOY sales metrics into numerical features, identifying Quick Service & Chicken, Pizza, and Mexican as top investment segments.
- Identified a \$2,100M+ average sales gap between Quick Service and non-QS categories and surfaced geographic variation in dining quality across 20 states by merging Yelp ratings with sales data.

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML, CSS

Frameworks & Libraries: React, Tailwind CSS, Supabase, PyTorch, TensorFlow, Pandas, NumPy, Streamlit

Developer Tools: Git, GitHub, Jupyter Notebook, VS Code, Figma, Excel, LaTeX
